Class 9001

**Type J Compact Pilot Lights** 

Type JP1R29

### Standard, Push-To-Test, and Remote Test Pilot Lights

Class 9001 Type J compact pilot lights are designed to be mounted in a 0.69 in. (11/16 in. or 17.5 mm) diameter mounting hole. Each terminal accepts up to two 14 AWG wires (CU only). Type J compact pilot lights meet NEMA 4 (watertight) and NEMA 13 (oiltight). Type JT push-to-test pilot lights have contacts built into the encapsulated body. Type JTR remote test pilot lights have dual inputs for one push remote testing—all you need is a push button with a current rating equal to or greater than the total lamp draw. Type JTR remote test pilot lights can also be energized from two separate input signals of the same voltage and polarity. This is done by wiring the Test terminal to the second input signal voltage and polarity. This is done by wiring the Test terminal to the second input signal.

| Body  | Bracket           | plug-in socket adapter           | ZB6Y011           |

- [4] Illuminated selector switches can be assembled by using a contact block/light module assembly in conjunction with a selector switch head, supplied without handle, and a transparent handle. See XB6 Illuminated Operators, page 19-16.
- The LED must be the same color as the push button cap.
- Order bulbs separately. See Additional XB6 Accessories, page 19-20. [6]
- [7] Electrical components with connection by printed circuit board pins are available. See Additional XB6 Accessories, page 19-20.
- [8] The LED must be the same color as the lens.
  - Neon bulb can only be used with a red, yellow, or white cap.

**NOTE:** The symbol  $\Omega$  indicates key withdrawal position(s).

For Legends, refer to XB4 Legend Holders, page 19-38, XB4 Legend Inserts, page 19-39 and XB4 Legend Sheets, page 19-39.

<sup>[1]</sup> Trigger action mushroom heads are tamper proof in that a change of contact state is not possible by teasing or floating the operator. For emergency stop applications, always use a trigger action push button (per EN/IEC 13850).

For contact configurations, see Table 19.82 Sequence of Contacts on Selector Switch Bodies, page 19-30.

For Legends, refer to XB4 Legend Holders, page 19-38, XB4 Legend Inserts, page 19-39, and XB4 Legend Sheets, page 19-39.

- —key no. 421E: add the suffix 12 to the catalog number.
- -key no. 458A: add the suffix 10 to the catalog number.
- —key no. 520E: add the suffix 14 to the catalog number.
- -key no. 3131A: add the suffix 20 to the catalog number.

Example: The catalog number for a Ø 40 mm red mushroom head for a trigger action, maintained push button, with release by key no. 421E becomes: ZB5AS94412.

<sup>[7]</sup> Trigger action mushroom heads are tamper proof in that a change of contact state is not possible by teasing or floating the operator. For emergency stop applications, always use a trigger action push button (per EN/IEC 13850).

For Legends, refer to XB4 Legend Holders, page 19-38, XB4 Legend Inserts, page 19-39 and XB4 Legend Sheets, page 19-39.

<sup>[12]</sup> 

For use in bright ambient conditions, for example, in sunlight.

Order bulb separately; see Table 19.118 BA9s Bulbs and Associated Accessories, page 19-41. For BA9 LED, see Table 19.403 LED, BA9s Base, page 19-129. [13] [14]

For 240 V LED, replace the last "B" or "G" in the catalog number with an "M". For example, ZB4BVB1 (24 V) becomes ZB4BVM1 (240 V).

<sup>[15]</sup> For Quick-Connect version, add "3" to the end of the catalog number Example: ZB4BVJ13 (Quick-Connect size 1 x 1/40" or 2 x 0.110").

### Table 19.97: Contact Blocks (Mounting Collar with Contact Blocks)

| Description          | Type of | Catalog Number |                  |
|----------------------|---------|----------------|------------------|
| Description          | N.O.    | N.C.           | Catalog Hulliber |
|                      | 1       | _              | ZB4BZ101         |
|                      | _       | 1              | ZB4BZ102         |
| Screw clamp terminal | 2       | _              | ZB4BZ103         |
| connections          | _       | 2              | ZB4BZ104         |
|                      | 1       | 1              | ZB4BZ105         |
|                      | 1       | 2              | ZB4BZ141         |

For Quick-Connect version add "3" to the end of the catalog number Example: ZB4BZ1013 (Quick-Connect size 1 x 0.250" or 2 x 0.110").

For Ring Tongue compatible blocks add "9" to the end of the catalog number (Example: ZB4BZ1029).

Electrical components with connection by printed circuit board pins are available. Refer to Catalog 9001CT0001.

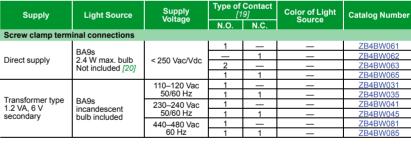

Electrical components with connection by plug-in connector are available. Refer to Catalog 9001CT0001.

7B4BW0•5

Can be fitted with additional contact blocks, seeTable 19.101 Add-On Contact Block (with screw clamp terminal connections), page 19-36.

For 240V LED, replace the "B" or "G" with "M". (Example: change "ZB4BW0**B**11 (24V) to ZB4BW0**M**11 (240V)) [18]

Can be fitted with additional contact blocks, seeTable 19.101 Add-On Contact Block (with screw clamp terminal connections), page 19-36. [19]

Order bulb separately, see BA9s Bulbs and Associated Accessories.

<sup>[21]</sup> Electrical components with connection by printed circuit board pins are available. Refer to Catalog 9001CT0001 for more details.

<sup>[22]</sup> [23] Electrical components with connection by plug-in connector are available. Refer to Catalog9001CT0001for more details. For Quick-Connect version add "3" to the end of the catalog number Example: ZBE1013 (Quick-Connect size 1 x 0.250" or 2 x 0.110").

For Ring Tongue compatible blocks add "9" to the end of the catalog number (Example: ZBE1029). [24]

<sup>[25]</sup> Cannot stack additional contact blocks onto these blocks.

For Legends, see XB5 Legend Holders, page 19-58 and XB5 Legend Inserts Only, page 19-59

XB5AD33

XB5A.I33

Trigger action mushroom heads are tamper proof in that a change of contact state is not possible by teasing or floating the operator. For emergency stop applications, always use a trigger action push button (per EN/IEC 13850).

| 60 mm Bezeled | Prada de Emergencia | ZBY9420        |
|               | Not Halt            | ZBY9220        |

For Legends, see XB5 Legend Holders, page 19-58 and XB5 Legend Inserts, page 19-59

<sup>[50]</sup> Trigger action mushroom heads are tamper proof in that a change of contact state is not possible by teasing or floating the operator. For emergency stop applications, always use a trigger action push button (per EN/IEC 13850).

Other key numbers:

<sup>—</sup>key no. 421E: add the suffix 12 to the catalog number.

<sup>—</sup>key no. 458A: add the suffix 10 to the catalog number.
—key no. 520E: add the suffix 14 to the catalog number.

<sup>—</sup>key no. 3131A: add the suffix 20 to the catalog number.

Example: The catalog number for a Ø 40 mm red mushroom head for a trigger action, maintained push button, with release by key no. 421E becomes: ZB5AS94412.

<sup>[57]</sup> 

For use in bright ambient conditions (i.e., sunlight).

Order bulb separately; see Table 19.183 BA9s Bulbs, page 19-61. For BA9 LED, see Table 19.403 Lamps, BA9s Base, page 19-129. *[58]* 

For Quick-Connect version, add "3" to the end of the catalog number Example: ZB5AVJ13 (Quick-Connect size 1 x 0.250" or 2 x 0.110"). [59] [60] For 240 V LED, replace the "B" or "G" with "M". (Example: ZB5AVB1 (24V) to ZB5AVM1 (240V))

ZB5AW0••1

ZB5AW035

Electrical components with connection by printed circuit board pins are available. Refer to Catalog9001CT0001 for more information. [63]

<sup>[64]</sup> Electrical components with connection by plug-in connector are available. Refer to Catalog 9001CT0001 for more information. Can be fitted with additional contact blocks, see Table 19.166 Add-On Contact Blocks, page 19-56.

*<sup>[65]</sup>* 

For 240V LED, replace the "B" or "G" with "M". (Example: change "ZB5AW0B11 (24 V) to ZB5AW0M11 (240 V)) [66]

Order bulbs separately, see Table 19.183 BA9s Bulbs and Associated Accessories, page 19-61

#### **XB5R and XB4R Accessories**

#### Table 19.195: Accessories

NOTE: The ZBRN2 has embedded communication port for Modbus Serial Line, where as ZBRN1 must be plugged with a communication module to support different protocols.

[98] Supplied with output function set to momentary Outputs programmable to maintained and Start-Stop.

[99] Cap can be clipped-in at 90° steps, through 360°.

[100] Cannot be used for wired contacts (no cable gland outlet).

[101] Box equipped with cable gland outlets, compatible with Harmony ZB5 push button heads.

[102] Not wired to the receiver.

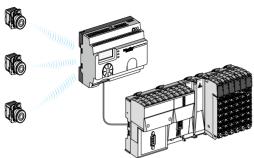

#### XB5R Plastic and XB4R Metal Wireless, **Batteryless Push Buttons**

Refer to Catalog DIA5ED2121213EN

#### **ZBRN1** and **ZBRN2** Access Points

Radio transmission between 3 transmitters and 1 Access Point

The access point of Harmony wireless and batteryless range provides network connectivity openness by operating as an intermediate equipment between the transmiter and the PLC (Programmable Logic Controller). The access point receives radio signals from the transmitters and converts them to communication protocols. Based on the model, it is connected to the PLC using either RS485 Modbus Serial line or Modbus/TCP protocol.

The access point can be used with transmitters such as XB4R and XB5R wireless and batteryless push buttons, rope pull switch, mushroom head pushbutton (1), and all PLCs that support Modbus Serial line over RS485 or Modbus/TCP protocols.

Depending on the application, an external or a relay antenna can be used to improve signal reception. An access point can support up to 60 radio transmitters

#### **Table 19.196: Configurable Access Points**

Stand-alone biometric switch (XB5S1/XB5S2)

X 🖭

Stand-alone USB biometric switch (XB5S3/XB5S4)

USB biometric switch dedicated to Schneider HMI (XB5S5)

#### **Biometric Switches**

The biometric switches of the Harmony® XB5S range are designed to control and secure access to systems and machines by checking users' authorization through fingerprint recognition.

The following types of biometric switches are available:

- · Stand-alone biometric switches
  - type XB5S1, with 2 fixed states (bistable)
  - type XB5S2, with pulse control (monostable)
- · Stand-alone USB biometric switches
  - type XB5S3, with 2 fixed states (bistable)
  - type XB5S4, with pulse control (monostable)
- USB biometric switches dedicated to Schneider HMI
  - type XB5S5, connected permanently with HMI

The biometric switches are aimed at 2 categories:

- · Administrators, who decide and manage the list of users
  - the only people who can record the fingerprints in the device memory
- . Users, who are authorized to use the biometric switch as a control unit
  - at least 1 of their fingerprints should be recorded in the device memory
  - access is granted when the finger is placed on the sensing screen

The USB switches communicate with the PC/HMI via the USB port to manage the user database. This database can be visualized, saved, and duplicated by PC/HMI with XB5SSoft application [103] [104]. The fingerprint records can also be erased in the absence of users

The Schneider HMI [105] with VijeoDesigner software [106] enables the switches to authorize different access levels and trace HMI operations of each user.

The switch operates on 24 Vdc and provides protection against:

- Reverse polarity
- Overload and short-circuit (switching capacity ≤ 200 mA)

#### Mounting

The product is of monolithic design (a single plastic housing) and is mounted by means of a nut (hand-tightened without need for tools) in a standard 22.5 mm/0.886 in. diameter hole. It can be installed on a flat, horizontal, or vertical surface.

A protective cover is available as an accessory to protect the active face of the sensing screen. This cover is mounted using a self-adhesive hinge.

A Female/Female USB extension cable makes it possible for the USB biometric switch to have the female USB port within a 22 mm/0.866 in. diameter hole on the control panel front.

#### **Environment**

- . Conformity to standards: UL, CSA, GOST, and CE
- Product certifications:
  - CSA C22-2 No. 14
- UL 508
- IEC 61000-6-2 and IEC 61000-6-4
- Degree of protection conforming to standard IEC 60529:
  - IP 65
  - NEMA 12
- Ambient air temperature:
  - For storage: -13 to 158°F (-25 to 70°C)
  - For operation: 23 to 122°F (-5 to 50° C)

<sup>[103]</sup> Compatible with all versions of Harmony XB5SSoft application. The XB5SSoft is a freeware application and can be downloaded from our website www.schneider-electric.com.

<sup>[104]</sup> The user database cannot be uploaded from USB biometric switch to the PC

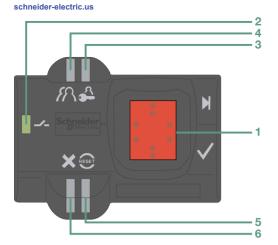

<sup>[105]</sup> Compatible with Magelis iPC, STU, OT, GXO, GT (except GT1000 series), GK, GH, and GTO models

<sup>[106]</sup> Compatible with VijeoDesigner HMI editor software V6.1, Service pack 2.

#### **XB5S Biometric Switches**

#### Description

- The stand-alone biometric switch (XB5S1/XB5S2) consists of a dark gray housing, with the following on its front face:
- A sensing screen 1 that allows the registration and subsequent recognition of the registered fingerprints,
- A green LED output state indicator 2 that illuminates when the output is activated (solid-state N.O. contact),
- An orange LED 3, indicating an administrator's "Registration" mode,
- An orange LED 4, indicating an operator's "Registration" mode,
- A red "RESET" LED 5 which indicates, in "Delete" mode, that the administrator is deleting all or part of the memory,
- A red LED 6 which flashes when the reader is presented with an "unrecognized" fingerprint or in the event of incorrect operation.
- The stand-alone USB biometric switch (XB5S3/XB5S4) consists of a dark gray housing with a sensing screen 1 for fingerprints, a green LED 2 for indicating the output state, and a red LED 6 for the unrecognized fingerprint on its front face.
- The USB biometric switch dedicated to Schneider HMI (XB5S5) consists of a dark gray housing with a sensing screen 1 for fingerprints on its front face.

#### Table 19.215: Color Codes

| Color  | KR1, 2, 3<br>Place Color Code<br>in Type Number | KR4, 5, 24, 25<br>Place Color Code<br>in Type Number |
|--------|---|--|
| Blue   | L   | L  |
| Yellow | Y   | Y  |
| White  | W   | _  |
| Orange | S   | S  |
| Gray   | E   | _  |

NOTE: For use in hazardous locations—See Square D Offering According to Class, Division, and Group, page 19-92. Contact blocks and legend plate not included unless otherwise noted.

When ordering, add prefix 9001 to the catalog number.

The universal push button operators contain one each of the following color inserts: black, red, green, yellow, orange, blue and white.

© Choose color code from Table 19.217 Color Codes for Type K Operators, page 19-73.

Knob has the words "Emergency Stop" in raised letters highlighted in white for readability. [1] [2] [3] [4]

| NOTE: To select contact | ct blocks, light modules | s, and accessories, see T | ype KA Contact Blocks | , page 19-90. |  |  |  |  |  |  |

- [5] For 1-3/8 in. or 2-1/4 in. Dia. Knob:
  - a) Order Type -20 or -21 knob from Additional Accessories for Type K and SK Operators, page 19-99.

  - b) Order 9001K54 adapter—allows Type -20 or -21 knob to fit on push pull operators. Voids UL and NEMA 6 rating.
    c) Can order assembled operator by adding color code to Type -20 or -21. Example: 9001KR9R would be 9001KR9R20 or 9001KR9R21. When ordering, add prefix 9001 to the catalog number.
- These operators can be ordered complete with contact blocks. For maximum block usage, see Table 19.280 "H" Codes, page 19-93. Add the chosen "H" number to the end of the operator. [7] [8]
- For contact sequences, see Table 19.218 Contact Sequences, page 19-73 [9] ▼ Choose one color from the Color Codes table here, and insert the color code in Type number. Example: KR9 with a yellow knob = KR9Y
- For color codes, see Color Codes for 30 mm Multifunction Operators, page 19-73.
- [11] To obtain a red knob with "Push Emergency Stop" printed on the red knob—substitute "R05" in place of "R"
- [12] ▲ Add the voltage assembly code as chosen from Table 19.274 Standard Light Modules for Types K, SK, and KX Control Units, page 19-91. Example: KR8P with a 277 V 50-60 Hz voltage = KR8P8.
- *[13]* The knob must be the same color as the LED light module chosen, for example, for a green LED, use a green knob.
- [14] On neon light modules, use clear knobs only.
- These colors are not available on illuminated push-pull operators.

[6]

#### Table 19.219: Illuminated Momentary Push Button Operators

| Amber  | Α             | A20                | A21                |  |  |  |  |  |

NOTE: UL Types 4, 13/NEMA 4, 13 For use in hazardous locations—See Square D Offering According to Class, Division, and Group, page 19-92. Contact blocks and legend plate not included unless otherwise noted.

19-74

<sup>[16]</sup> When ordering, add prefix 9001 to the catalog number.

These operators can be ordered complete with contact blocks. For maximum block usage, see Table 19.280 "H" Codes, page 19-93. Add the "H" number to the end of the operator type

<sup>[18]</sup> Add the color code as chosen from the color cap table. Example: K2L25 with a blue 1–3/8 in. mushroom button = K2L25L20.

<sup>[19]</sup> ■ Add the voltage assembly code as chosen from Standard and Shallow Depth Light Modules, page 19-91. **Example: K2L** with 240 Vac/Vdc = **K2L25**. On neon light modules, use clear color caps only.

<sup>[20]</sup> 

<sup>[21]</sup> 

The cap must be the same color as the LED light module chosen, e.g., for red LED, use red color cap. The only difference between a no guard (K2L\_) operator and mushroom button operator is the color cap. [22]

## 9001 K Selector Switches

Class 9001 / Refer to Catalog 9001CT1103

#### Table 19.223: Key Withdrawl Codes

**NOTE:** To select and order Contact Blocks, Light Modules, Knobs, and Accessories, see Type KA Contact Blocks, page 19-90 through Hermetically Sealed Power Reed Contact Blocks, page 19-92.

When ordering, add prefix 9001 to the catalog number.

These operators can be ordered complete with contact blocks. Add the "H code" from Table 19.280 "H" Codes, page 19-93 as needed for your application.

• Add the knob color code from Table 19.222 Selector Switch Assembly Codes, page 19-75 [24] [25]

<sup>[26]</sup> 

Add the key withdrawal code from Table 19.223 Key Withdrawl Codes, page 19-75

<sup>■</sup> Add the voltage assembly code as chosen from Standard and Shallow Depth Light Modules, page 19-91. Example: K25J∎ with 208Vac = K25J3

| Clear  | С              | C8            | FC               | C24              |  |

#### Table 19.226: Key Withdrawal Codes [34]

**NOTE**: To select and order Contact Blocks, Light Modules, Knobs, and Accessories, see Type KA Contact Blocks, page 19-90 through Hermetically Sealed Power Reed Contact Blocks, page 19-92.

[31]

<sup>[28]</sup> When ordering, add prefix 9001 to the catalog number.

<sup>[29]</sup> These operators can be ordered complete with contact blocks. Add the "H code" from Table 19.280 "H" Codes, page 19-93 as needed for your application.

<sup>[30]</sup> ◆ Add the knob color code from Table 19.225 Selector Switch Assembly Code, page 19-76. For LED, knob color must match LED.

<sup>▼</sup> Add the key withdrawal code from Key Widthdrawl Codes table. Example: KS43K with key withdrawal in the right position only = KS43K6.

For other color knobs replace the B with knob color code from the Selector Switch Assembly Code table. [32] [33]

<sup>■</sup> Add the voltage assembly code as chosen from page 19–86.

<sup>[34]</sup> Add the key withdrawal code from Key Widthdrawl Codes table. Example: KS43K with key withdrawal in the right position only = KS43K6.

| 05                      | 1 kΩ       | 13          | 500 kΩ     |  |  |  |  |
| 39                      | 2 kΩ       | 37          | 750 kΩ     |  |  |  |  |
| 06                      | 2.5 kΩ     | 14          | 1 ΜΩ       |  |  |  |  |
| <b>Tandem Potentiom</b> | eter       |             |            |  |  |  |  |
| Suffix [41]             |            | Resistance  | Resistance |  |  |  |  |
|                         |            | Front       | Rear       |  |  |  |  |
| 82                      |            | 1 kW        | 1 kW       |  |  |  |  |

- When ordering, add prefix 9001 to the catalog number.
- [36] These operators can be ordered complete with contact blocks. Add the "H code" from Table 19.280 "H" Codes, page 19-93 as needed for your application.
- [37] ◆ Add the knob color code from the Selector Switch Assembly Code table. For LED, knob color must match LED.
- Add the key withdrawal code from the Key Withdrawl Codes table. [38]
- [39] ■ Add the key withdrawal code from Key Widthdrawl Codes table. Example: KS43K with key withdrawal in the right position only = KS43K6.
- [40] Add the knob color code from the Selector Switch Assembly Code table. For LED, knob color must match LED.
- For the complete part number, add the suffix from Table 19.231 Potentiometer Suffixes, page 19-77 to the catalog number. Example: 9001K2105.

| 0 | 1 | 0                   | 1 | Н              | B&DV                    | Vired in Parallel |  |
| 1 | 1 | 0                   | 1 | Н              | KA5 [43]                | 2                 |  |
| 1 | 0 | 1                   | 1 | Н              | KA5 [43]                | 1                 |  |

NOTE: For Outline Dimensions see Catalog 9001CT1103

NOTE: When ordering, add prefix 9001 to the catalog number.

#### When ordering, please specify:

- Quantity
- Class Number
- Type or Catalog Number

For "H" Numbers, see Type K, SK, and KX Contact Block "H" Numbers, page 19-93

#### Selection

Shown below is a simplified method of selecting a selector switch to meet almost any combination of contact sequences.

Step No. 1
Determine the contact sequence(s) required. Set up a target table like the one shown for the example below.

| Contact Sequence<br>0—contact open 1—<br>contact closed | × | 1 | 1 |
|---|---|---|---|
| Α   | 1 | 0 | 0 |
| В   | 0 | 1 | 0 |
| С   | 0 | 0 | 1 |

#### Step No. 2

Step No. 2
Look for a cam type common to all sequences in:
Table 19.232 2 Position Selector Switch, page 19-78,
Table 19.233 3 Position Selector Switch, page 19-78, or
Table 19.234 4 Position Selector Switch, page 19-78.
For the example above, Table 19.233 3 Position Selector Switch, page
19-78 would be used.

For the contact sequences A (1 0 0), B (0 1 0) and C (0 0 1) of the example above, cam types F and L are common to all three sequences.

Next, use the cam type common to all the sequences (if several cam types are common, choose one) to find the operator type number. Go to the proper reference topic as indicated in the table below:

| Number of<br>Positions | Push Button<br>Line            | Reference topics  |
|------------------------|--------------------------------|---|
| 2                      | Type K,<br>Type SK,<br>Type KX | Type K, page 19-75<br>Type SK, page 19-85<br>"H" Numbers, page 19-93<br>Type KX with Contacts, page 19-102<br>Type KX without Contacts, page 19-104 |
| 3                      | Type K,<br>Type SK,<br>Type KX | Type K, page 19-76<br>Type SK, page 19-86<br>"H" Numbers, page 19-93<br>Type KX with Contacts, page 19-102<br>Type KX without Contacts, page 19-104 |
| 4                      | Type K,<br>Type SK,<br>Type KX | Type K, page 19-77<br>Type SK, page 19-87<br>Type KX, page 19-102   |

If for the example above a manual return operator with a standard black knob is required and:
The F cam type is chosen, the operator type number is:

- Type K—Class 9001 Type KS46B, page 19-76
- Type SK—Class 9001 Type SKS46B, page 19-86 • Type KX—Class 9001 Type KXSDFB, page 19-104

The L cam type is chosen, the operator type number is:

- Type K—Class 9001 Type KS401B, page 19-76
- Type SK—Class 9001 Type SKS401B, page 19-86
- Type KX—Class 9001 Type KXSDLB, page 19-104

#### Step No. 4:

Determine the contact blocks required by using the same table in Step

If, for the example above, the F cam type is chosen:

- Use a 9001KA3 mounted on side no. 2 for sequence A (1 0 0).
- Use a 9001KA3 mounted on side no. 1 for sequence B (0 1 0).
- Use a 9001KA2 mounted on side no. 1 or 2 for sequence C (0 0 1).

If, for the example above, the L cam type is chosen:

- Use a 9001KA2 mounted on side no. 2 for sequence A (1 0 0).
- Use a 9001KA2 mounted on side no. 1 or a 9001KA3 mounted on side no. 2 for sequence B (0 1 0).
- Use a 9001KA3 mounted on side no. 1 for sequence C (0 0 1).

  One Type KA1 double circuit block can be used in place of one Type KA2 single circuit block plus one Type KA3 single circuit block plus one Type KA3 single circuit block

  Type KA3 single circuit block plus one Type KA3 single circuit block

  Type KA3 single circuit block plus one Type KA3 single circuit block mounted on the same side.

#### Type K Heavy Duty Pilot Lights

Class 9001 / Refer to Catalog 9001CT1103

#### Type K Heavy Duty Pilot Lights

When ordering, add prefix 9001 to the catalog number.

#### Typical Wiring Diagram

For Contact Blocks, see Type KA Contact Blocks, page 19-90 For Light Modules, see Standard and Shallow Depth Light Modules, page 19-91 For Accessories, see Type K and SK Accessories, page 19-94

- For use in hazardous locations, see Square D Offering According to Class, Division, and Group, page 19-92
- [45] Legend plates not included.
- When ordering, add prefix 9001 to the catalog number. [46]
- Add the color code as chosen from Table 19.236 Color Caps, page 19-79. **EXAMPLE: KP1 with a blue fresnel cap = KP1L31** [47]
- The cap must be the same color as the LED light module chosen, e.g., for green LED, use green color cap. On neon light modules, use clear color caps only. [48]
- [49]
- On remote test pilot lights use only full voltage or resistor voltage assembly codes. Do not choose LED (exception these LED codes are allowed: 38LG, 38LL, 38LR, 38LW, 38LY), neon or [50] transformer codes. For AC use only.

#### Type K Heavy Duty Specialty Operators

Class 9001 / Refer to Catalog 9001CT1103

(1) Contact Closed (0) Contact Open

# The joy stick operator is ideal for applications where only one circuit is to be energized at one time. The three position joy stick closes one circuit in each Up-Down or Right-Left position with all circuits open in center position. The five position operator closes one circuit in each Up, Down, Left and Right position with all circuits open in center position.

Up, Down, Left and right position with an circuits open in center position. Momentary contact operators are spring return to the center position. Maintained operators remain in position and must be returned manually. Operators with latch cannot be operated until the latch button in center of handle is pressed.

Selector Push Button 9001KQ

Inserts are field convertible. For colors not listed, order operator without insert, plus separate color insert from Additional Accessories for Type K and SK Operators, page 19-99. Up to two Type KA contact blocks can be mounted in tandem (total of four blocks). Selector push buttons cannot be illuminated.

Order Contact Blocks From Type KA Contact Blocks, page 19-90

Key operated push buttons are used wherever unauthorized use of a push button is discouraged. Examples are locking a Start push button in the extended position or locking a Stop push button in the depressed position. The operator can also be locked in the flush position—holding all contacts open. Up to two Type KA contact blocks can be mounted in tandem (total of four blocks). ("X" = locked position) [57]

|---|--------------|--------------------------|----------------|----------------------------------|
| Description   | Extended     | Flush                    | Depres-<br>sed | Type [53]                        |
| Push button operable only with key in lock. Key is removable in locked position only.   | <u>×</u> _ x | $\frac{\overline{x}}{x}$ |                | KR131<br>KR132<br>KR133<br>KR137 |
| Push button operable with or without key in lock. Push button can be locked with key only. Key removable in both locked or unlocked position.   | <u>×</u>     | $\frac{\overline{x}}{x}$ |                | KR141<br>KR142<br>KR143<br>KR147 |
| To lock the unit, rotate the key with the button in the extended position. Then, push the button to lock it in the position indicated at right. Key is removable only in this position. | =            | <u>×</u>                 | $\overline{x}$ | KR152<br>KR153                   |

- [51] For use in hazardous locations—See Square D Offering According to Class, Division, and Group, page 19-92.
- [52] Legend plate and contact block not included unless otherwise noted.
- [53] When ordering, add prefix 9001 to the catalog number.
- [54] These operators can be ordered complete with contact blocks—a total of four (4) contact blocks can be used. Add the "H" number chosen from Table 19.280 "H" Codes, page 19-93 to the operator type number and add the cost of the "H" number to the operator cost.
- [55] Cams are not interchangeable.
- [56] Order color inserts from Additional Accessories for Type K and SK Operators, page 19-99.
- [57] All key operated push buttons are furnished as standard with Square D no. E10 key change. See catalog 9001CT0001 for other key changes.

Timing period is adjustable from 0.1 second to 60 seconds and begins after button has been released. Devices include a pack of seven color inserts for color coding the push button. See Accessories, page 19-99 for Universal color insert. Contacts are quick make-quick break.

Emergency Break-Glass Operator 9001K15

Push-on Push-off Module 9001K85

Wobble Stick 9001K8

NOTE: When mounted in top or bottom hole of a Type K enclosure, the Off Delay Push Button requires one additional space below or above operator. When mounted other than in top or bottom hole, device may require two additional spaces, one above and one below operator. Closing plates must be installed on unused holes.

- [58] Meets UL Type 13/NEMA 13 and UL Type 6/NEMA 6, which UL and NEMA consider an equivalent to UL Type 4/NEMA 4.
- [59] For use in hazardous locations—See Square D Offering According to Class, Division, and Group, page 19-92.
- [60] Legend plate and contact block not included unless otherwise noted.
- [61] When ordering, add prefix 9001 to the catalog number
- [62] Choose one color for each button. R = red, G = green, B = Black. Example: 9001KR6 with left red and right black = 9001KR6RB. See Color Codes for 30 mm Multifunction Operators, page 19-72.
- [63] Universal for KR6, KR67, KR7 includes 2 inserts each of black, red and green.
- [64] Universal for KR11, KR12 includes 2 each of black, red, green, yellow, orange, blue, white.
- [65] A Choose one color for each button. R = red, G = green, B = Black. Example: 9001KR6 with left red and right black = 9001KR6RB. See Color Codes, page 19-72.

[66] For enclosed versions see 9001KY and 9001SKY Control Stations, page 19-112.

Class 9001 / Refer to Catalog 9001CT1103

#### Table 19.249: Color Codes

| Color  | ■ SKR1, 2, 3 Place Color Code in Type<br>Number | ▲ SKR4, 5, 24, 25 Place Color Code in Type Number |
|--------|---|---|
| Blue   | L   | L   |
| Yellow | Υ   | Y   |
| White  | W   | _   |
| Orange | S   | S   |
| Gray   | E   | _   |

NOTE: To select and order Contact Blocks, Light Modules, Knobs, and Accessories, see Type KA Contact Blocks, page 19-90 through Hermetically Sealed Power Reed Contact Blocks, page 19-92.

NOTE: For use in hazardous locations—See Square D Offering According to Class, Division, and Group, page 19-92. Contact blocks and legend plate not included unless otherwise noted.

When ordering, add prefix 9001 to the catalog number.

<sup>[68]</sup> These operators can be ordered complete with contact blocks. For maximum block usage, see Table 19.280 "H" Codes, page 19-93. Add the "H" number to the end of the operator type number.

<sup>[69]</sup> The universal push button operators include one each of the following color inserts: black, red, green, yellow, orange, blue and white.

<sup>■</sup> See Table 19.249 Color Codes , page 19-82. [70]

Knob has the words "Emergency Stop" in raised letters highlighted in white for readability. [71]

<sup>[72]</sup> ▲ See Table 19.249 Color Codes , page 19-82.

NOTE: To select and order Contact Blocks, Light Modules, Knobs, and Accessories, see Type KA Contact Blocks, page 19-90 through Hermetically Sealed Power Reed Contact Blocks, page 19-92.

- [73] When ordering, add prefix 9001 to the catalog number
- [74] These operators can be ordered complete with contact blocks. For maximum block usage, see Table 19.280 "H" Codes, page 19-93. Add the chosen "H" number to the end of the operator.
- On neon light modules, use clear knobs only.
- ▲ See Table 19.253 Color Codes, page 19.83 and insert the color code in the Type number. Example: SKR9() with a yellow knob = SKR9Y
- [77] To obtain a red knob with "Push Emergency Stop" printed on the red knob—substitute "R05" in place of "R"
- ◆ Add the voltage assembly code as chosen from Standard and Shallow Depth Light Modules, page 19-91. Example: SKR8P♦ with 277 V 50–60 Hz = SKR8P8 For positions, refer to Table 19.254 Positions for 9001SKR8RH1 or H13, page 19-83 and Table 19.255 Positions for 9001SKR8H25, page 19-83. [78]
- *[79]*
- The knob must be the same color as the LED light module chosen, for example, for a green LED, use a green knob. [80]

These colors are not available on illuminated push-pull operators.

Class 9001 / Refer to Catalog 9001CT1103

#### Type SK Corrosion Resistant Illuminated Operators

Table 19.256: Illuminated Push Button Operators

| Blue   | L           | L20                           | L21                           |  |  |  |  |  |
| Yellow | Y           | Y20                           | Y21                           |  |  |  |  |  |
| White  | W           | W20                           | W21                           |  |  |  |  |  |
| Clear  | С           | C20                           | C21                           |  |  |  |  |  |
| Amber  | Α           | A20                           | A21                           |  |  |  |  |  |

NOTE: To select and order Contact Blocks, Light Modules, Knobs, and Accessories, see Type KA Contact Blocks, page 19-90 through Hermetically Sealed Power Reed Contact Blocks, page 19-92.

NOTE: For use in hazardous locations—See Square D Offering According to Class, Division, and Group, page 19-92. Contact blocks and legend plate not included unless otherwise noted.

<sup>[82]</sup> When ordering, add prefix 9001 to the catalog number.

<sup>[83]</sup> These operators can be ordered complete with contact blocks. For maximum block usage, see Table 19.280 "H" Codes, page 19-93. Add the "H" number to the end of the operator type

<sup>■</sup> Add the voltage assembly code as chosen from Standard and Shallow Depth Light Modules, page 19-91. EXAMPLE: SK2L\_with 240 Vac/Vdc = SK2L25.

On neon light modules, use clear color caps only. [85]

Add the color code as chosen from the color cap table below. EXAMPLE: SK2L25 with a blue 1-3/8 in. mushroom button = SK2L25L20. [86]

The cap must be the same color as the LED light module chosen, e.g., for green LED, use green color cap. [87]

<sup>[88]</sup> The only difference between a no guard (SK2L) operator and mushroom button operator is the color cap.

Contact Blocks: Contact Blocks, page 19-90, Hermetically Sealed Logic Reed Contact Blocks, page 19-92, Hermetically Sealed Power Reed Contact Blocks, page 19-92 Light Modules: Standard Light Modules, page 19-91 Knobs and Accessories: Additional Accessories for Type K and SK Operators, page 19-99

<sup>[89]</sup> When ordering, add prefix 9001 to the catalog number.

These operators can be ordered complete with contact blocks. For maximum block usage, see Table 19.280 "H" Codes, page 19-93. Add the chosen "H" number to the end of the operator.

• Add the knob color code chosen from Table 19.259 Selector Switch Assembly Code and Knob Cat. No., page 19-85. For LED, knob color must match LED. [90]

<sup>[91]</sup> 

<sup>■</sup> Add the voltage assembly code as chosen from Standard Light Modules, page 19-91. Example: K25J with 208Vac = K25J3

#### 9001SK 3-Position Selector Switches

Contact Blocks: Contact Blocks, page 19-90, Hermetically Sealed Logic Reed Contact Blocks, page 19-92, Hermetically Sealed Power Reed Contact Blocks, page 19-92 Light Modules: Standard Light Modules, page 19-91 Knobs and Accessories: Additional Accessories for Type K and SK Operators, page 19-99

When ordering, add prefix 9001 to the catalog number.

[94] These operators can be ordered complete with contact blocks. Add the "H code" from Table 19.280 "H" Codes, page 19-93 as needed for your application.

[95]

◆ Add the knob color code chosen from the Selector Switch Assembly Code table. For LED, knob color must match LED.

For other color knobs replace the B with knob color code. See Table 19.261 Selector Switch Assembly Code and Knob Cat. No., page 19-86. 1961

■ Add the voltage assembly code as chosen from Standard Light Modules, page 19-91. Example: K25J with 208Vac = K25J3

[97] [98] Add the knob color code. For LED, knob color must match LED.

#### 9001SK Corrosion Resistant Selector **Switches**

Class 9001 / Refer to Catalog 9001CT1103

| 0                       |                         |              | Resistance |
| Suffix [104]            |                         | Front        | Rear       |

1 kΩ 1 kΩ NOTE: Any potentiometer with a shaft 7/8 in. long and 1/4 in. diameter may be used with these operators.

<sup>[99]</sup> When ordering, add prefix 9001 to the catalog number.

<sup>[100]</sup> These operators can be ordered complete with contact blocks. Add the "H code" from Table 19.280 "H" Codes, page 19-93 as needed for your application.

<sup>[101] •</sup> Add the knob color code chosen from the Selector Switch Assembly Code table. For LED, knob color must match LED.

<sup>[102]</sup> Add the voltage assembly code as chosen from Standard Light Modules, page 19-91. Example: K25J with 208Vac = K25J3

<sup>[103]</sup> Add the knob color code from Table 19.237. For LED, knob color must match LED

<sup>[104]</sup> For the complete part number, add the suffix from this table to the catalog number from Table 19.264 Potentiometers with Dial Plate, page 19-87. Example: 9001K2105.

Class 9001 / Refer to Catalog 9001CT1103

| White  | W31                   | W9                  |
| Yellow | Y31                   | Y9                  |

#### **Typical Wiring Diagram**

**NOTE:** To select and order Contact Blocks, Light Modules, Knobs, and Accessories, see Type KA Contact Blocks, page 19-90 through Hermetically Sealed Power Reed Contact Blocks, page 19-92.

NOTE: For use in hazardous locations—See Square D Offering According to Class, Division, and Group, page 19-92. Contact blocks and legend plate not included unless otherwise noted.

- [106] Add the voltage assembly code as chosen from Standard and Shallow Depth Light Modules, page 19-91.EXAMPLE: SKT---R31 with 208 Vac red LED voltage = SKT37LRR31.
- Add the color code as chosen from the color cap table below. **EXAMPLE: SKP1 with a blue fresnel cap = SKP1L31.**
- [108] The cap must be the same color as the LED light module chosen, e.g., for a green LED, use a green color cap
- [109] On neon light modules, use clear color caps only.
- [110] Use only full voltage or resistor voltage assembly codes on remote test pilot lights. Do not choose LED, neon or transformer codes. For AC use only.
- Use only full voltage or resistor voltage assembly codes on remote test pilot lights. Do not choose LED (exception these LED codes are allowed: 38LG, 38LL, 38LR, 38LW, 38LY), neon or [111] transformer codes. For AC use only.
- [112] Add the color code as chosen from the color cap table below. **EXAMPLE: SKP1 with a blue fresnel cap = SKP1L31.**

<sup>[105]</sup> When ordering, add prefix 9001 to the catalog number.

#### **Type SK Corrosion Resistant Multifunction Operators**

Class 9001 / Refer to Catalog 9001CT1103

#### **Type SK Corrosion Resistant Multifunction Operators**

Table 19.268: Multifunction Operators—UL Types 4, 4X, 13/NEMA 4, 4X, 13 [113][114]

| Interlocked Assembly |            | Description                                   | Color           | Contacts [115] | Without Contacts [115] |
|----------------------|------------|---|-----------------|----------------|------------------------|

#### Type KA Contact Blocks

The Class 9001 Type KA contact blocks are Fingersafe® contact blocks (meeting VDE 0106 Part 100). They have one screw mounting and captive (backed out) plus/minus terminal screws. These contact blocks are double-break, direct-acting contacts. Because of the wiping action of these contacts, they are suitable for use with programmable controllers. All contact blocks listed below accept up to 2 #12—#24 AWG solid or stranded wires. Recommended tightening torque for screw terminals is 7 lb-in.

#### Contact blocks listed below are not Fingersafe, but provide:

- Terminals that accept ring tongue/fork tongue connectors
- Short single circuit contact blocks (0.75" deep vs. 0.97" deep on the Fingersafe)
- Same as old style Series G product available prior to March, 1989.
- For assembled operators, use form Y238 (add to catalog number as suffix, for example: 9001KRU1H13Y238)

<sup>[121]</sup> For use with all operators except KX and remote test pilot.

<sup>[122]</sup> For use in hazardous locations—See Square D Offering According to Class, Division, and Group, page 19-92. [123] With LED light modules, use either a clear color cap or a cap the same color as the LED.

<sup>[124]</sup> With neon type light modules, use a **clear** color cap only. [125] When ordering, add prefix 9001 to the catalog number.

<sup>[126]</sup> Not for use on KX operators.

<sup>[127]</sup> Reduces the depth of illuminated push buttons with contact blocks by over 33%.

| 115            | .50    | 58   | .50   | 58         | 3.0 |

Hazardous locations do not always require the use of explosion-proof equipment like the Class 9001 Type BR control stations. Selecting the most appropriate device for the location can save you money. For more information on the types of hazardous locations, contact your local electrical inspector.

#### Table 19.276: Hazardous Locations

[128] Any Class 9001 Type K, SK or KX operator can be used in an area classified as Class I, Division 2 hazardous locations, if:

1. Only logic (KA40 series) or power (KA50 series) reed contact blocks are used.

2. All Type K and SK illuminated operators are UL approved for use in Class I Division 2 areas. (Add Form Y243 to single lamp Push-To-Test pilot lights.)

3. Type KX illuminated operators do not use 4 lamp light modules, or 2 lamp light modules other than the transformer type. (Add Form Y243 to single lamp Push-To-Test pilot lights.)

4. The operators are mounted in any NEMA 4 & 13 enclosures.

[129] UL Listed: File E10054(N), CCN NOIV.

[130] Any Class 9001 Type K, SK, or KX operator mounted in a Class 9001 Type KY, KYSS, KYAF, SKY enclosure may be used, except potentiometer operators.

[131] Not for use in pendant stations

[132] When ordering, add prefix 9001 to the catalog number.

[133] All contact blocks listed below accept #12-18 solid or stranded wire.

[134] The power reed contact blocks can be used with standard industrial relays and starters through NEMA Size 4. Minimum voltage is 5 V and the minimum current is 1 mA.

[135] Inductive Rating—35% Power Factor.

[136] Inductive and Resistive Ratings

# Type K, SK and KX Contact Block "H" Numbers

Class 9001 / Refer to Catalog 9001CT1103

#### Type K, SK, and KX Contact Block "H" Numbers

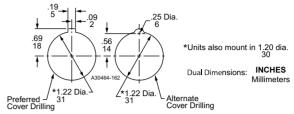

The design of Class 9001 Type KA contact blocks allows them to be mounted side by side and/or in tandem. This enables you to specify an operator and a specific arrangement of contact blocks (shipped fully assembled) with a single Type number.

#### Table 19.280: "H" Codes

|                              | Suffix No.                |     |     | Posi | tions |     |     |

#### Mounting Hole for All Types K, SK, and KX Control Units

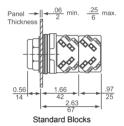

Hole Punch: Use Greenlee Tool #60242 to punch mounting hole and notch

Maximum Contact Block Usage(Includes Types K, SK and KX)

- 2 blocks mounted side by side only: Any 2, 3 or 4 position spring return selector switch (non-illuminated, illuminated or keyed).
- 2 blocks mounted in tandem 1 side only: Any 2 operator interlocked push button.
- 2 blocks mounted in tandem (total of four blocks): Any selector push button, keyed push button, 2, 3, or 4 position maintained selector switch (non-illuminated, illuminated or keyed), push-pull operators (non-illuminated or illuminated), joy stick, dual push button.
- 3 blocks mounted in tandem (total of six blocks): Single momentary push buttons (non-illuminated or illuminated).

<sup>[137]</sup> When ordering, add prefix 9001 to the catalog number.

<sup>[138]</sup> Operator can be converted to an illuminated operator by removing the liner (6512240601) and adding a light module.

<sup>[139]</sup> These operators can be supplied with 1-3/8 in or 2-1/4 in dia. mushroom buttons. For 1-3/8 in.: add () 20 to type number. For 2-1/4 in.: Add () 21 to type number. The () refers to the color chosen—see Additional Accessories for Type K and SK Operators, page 19-99. Voids UL and NEMA 6 Rating.

<sup>[140]</sup> Operator can be converted to a non-illuminated operator by adding liner (6512240601).

<sup>[141]</sup> Operator includes jumper wires for push-to-test conversion

<sup>[155]</sup> When ordering, add prefix 9001 to the catalog number.

<sup>[156]</sup> Includes one each of the following color inserts: Black, Red, Green, Yellow, Orange, Blue, and White.

<sup>[157]</sup> The mushroom button cap listed here may be assembled to a 9001KR1U or SKR1U to form a 9001KR4 or SKR4.

<sup>&</sup>quot;EMERGENCY STOP" is in raised letters and hot stamped white across the front of the mushroom button.

<sup>[159]</sup> The mushroom button cap listed here may be assembled to a 9001KR1U or SKR1U to form a 9001KR5 or SKR5.

<sup>[160]</sup> The mushroom button cap listed here may be assembled to a 9001KR20 to form a 9001KR24 or SKR20 to form a 9001SKR24. [161] The mushroom button cap listed here may be assembled to a 9001KR20 to form a 9001KR25 or a SKR20 to form a 9001SKR25.

<sup>[162]</sup> These color caps are opaque and are for use on non-illuminated operators only.[163] Red knob with "Push Emergency Stop" marked on top of knob.[164] Includes two of each of the following color inserts: Black, Red, and Green.

<sup>[165]</sup> May be used on KR8 and KR9 operators. Order mushroom button and K54 adapter. Using the K54 adapter voids Type 6 rating.

## Replacement and Repair Parts for Type K and SK Operators

Table 19.300: Repair Parts

| Description   | Part Number |
|---|-------------|
| E10 Key   | 2941101100  |
| Gray cap for KR11, KR12, SKR11, or SKR12              | 3105217001  |
| Clear plastic top (only) for 9001K44 & SK44 Ring Nut) | 4487D63XI   |
| Gasket for Type K and SK Push-Pull Knob               | 6509701801  |
| Gasket for Plastic Illuminated Lens                   | 6509701901  |
| Gasket for Type K and SK selector switch knob         | 3105406401  |
| Black Compensating Gasket (Type K and SK Operators)   | 6509702001  |
| Liner for Non-Illuminated Operators                   | 6509704901  |
| Locking Thrust Washer                                 | 6512231201  |
| Nylon Spacer  | 6509705001  |
| Locking Thrust Washer (Std. Type SK Operator)         | 6512240601  |
| Push-Pull Mushroom Adapter [171]                      | K54         |
| Rubber Boot for Joystick                              | 6512243201  |
| Knob on Joysticks without latch                       | 4458D20X3   |
| Knob for SK Potentiometer                             | 3105404408  |
| Fingersafe™ Cover for 9001KM                          | 6508804101  |

# Table 19.301: KU Replacement Ring Nuts (Threaded Inside and Out)

| Used On                           | Part Number |
|-----------------------------------|-------------|
| KU1 through KU8, KU27, KU37, KU47 | 3105204101  |
| KU17, KU18                        | 3105205901  |

<sup>[166]</sup> When ordering, add prefix 9001 to the catalog number.

<sup>[167]</sup> Secondary ring nut (holds knob on selector switch or potentiometer).

<sup>[168]</sup> Maintained button of two button operator.

<sup>[169]</sup> Momentary button of two button operator.

<sup>[170]</sup> GE44 and GE755 are interchangeable (GE755 gives longer life). If a GE44 lamp is ordered, a GE755 (2550101020) will be substituted. For a replacement lamp in a current series light module, seeStandard and Shallow Depth Light Modules, page 19-91.

## Type K and SK Accessories

Class 9001 / Refer to Catalog 9001CT1103

#### Interlock for Type K and SK Operators

For mechanically interlocking two push buttons so that only one button can be depressed at a time. A Type K3 attachment is furnished with the **9001 KR11**, **KR12**, **SKR11**, **SKR12**, **SKRU1** and **SKRU11** operators. However, these are maintained operators and the **K3** interlock serves to release one of the buttons when the other is depressed. When used with momentary contact buttons, the **K3** interlock **does not** hold the buttons in the depressed position. It simply prevents pushing both buttons at the same time.

#### Table 19.302: Interlock

| Description   | Туре |
|---|------|
| The Type <b>K3</b> interlock is mounted behind the operators. Operators not included. | K3   |
| NOTE: When ordering, add prefix 9001 to the catalog number.                           |      |

#### Screwdriver for Type K and SK Operators

#### Table 19.303: Screwdriver

| Description  | Type |
|--|------|
| Used to tighten mounting screws on contact blocks and light modules. | K69  |
| NOTE: When ordering, add prefix 9001 to the catalog number.          |      |

#### Wrenches for Type K and SK Operators

#### Table 19.304: Wrenches

| Where Used   | Type |
|--|------|
| For tightening ring nuts on 22 and 30 mm control units | K95  |
| For tightening threaded protective caps                | K1   |

NOTE: When ordering, add prefix 9001 to the catalog number.

#### Table 19.305: Push Buttons—Single, with Contacts

All Type KX push buttons and pilot lights have a blank insert as standard. These blank inserts can be custom marked using a marking pen, a mechanical lettering set, press letters, or a tape lettering machine that marks a tape which can then be transferred to the

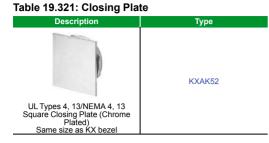

To have legend inserts installed into the operators, order the operator as normal and then indicate where to install the legend inserts using the numbered positions shown on the operator ordered.

Example:

9001KXRL1GRGRH2 with a 9001KXN 401 in position 1 9001KXN 503 in position 2 9001KXN 504 in position 3 9001KXN 402 in position 4

- When ordering, add prefix 9001 to the catalog number.
- [10] These legend inserts have vertical printing.
- [11] These legend inserts are for the pilot lights in the center of the operator.

These legend inserts are for the push button portion of the operator.

Each KXAC28 includes a clear cover and 1 each of all colors. If the same color is required for position #1and #2 of the KXPB operator, order 2 of Type KXAC28.

<sup>[13]</sup> [14]

When specifying color codes—the first will be installed in #1 and the second in #2.

Each KXAC48 includes a clear cover and 1 each of all colors. If the same color is required for position #1and #2 of the KXPC operator, order 2 of Type KXAC48. [15]

<sup>[16]</sup> When specifying color codes—the first will be installed in #1, the second in #2, the third in #3 and the fourth in #4.

<sup>[17]</sup> Two required per operator. When ordering an assembled operator—specify two code numbers. The first code will be assembled into #1 and the second code will be assembled into #2

XAPA1104

XAPG39400

For customer assembly using XB5 operators and standard screw-terminal contact blocks, see XB5 Non-Illuminated Operators, page 19-46.

Either mounting method can be used: contact block ZENL mounting on metal plate, or contact block ZBE mounting on operator with mounting collar.

Uses standard XB5 products from XB5 Complete Devices, page 19-43 through XB5 Accessories, page 19-60. Do not use ZENL style contact blocks.

For Replacement Interiors, see Replacement Interiors for Type B Standard Duty Push Button Stations, page 19-111.

For Ratings, see Electrical Contact Ratings, page 19-111.

See Table 19.342 Replacement Interiors For Type B Standard Duty Push Button Stations , page 19-111.

<sup>[7]</sup> Uses standard 2.0 or 2.13 in. deep wall boxes, single gang for Types BF1 and BF2, two gang for Type BF3

Also rated for Class I, Division I and II, Groups B, C, or D; Class II, Division I and II, Groups E, F, or G [8] When ordering, add prefix 9001 to the catalog number.

Replacement case/covers are not avaiulable for Type BR devices.

<sup>[9]</sup> [10]

<sup>[11]</sup> Includes factory installed lockout on the cover.

NOTE: See Table 19.348 Assembled Control Stations, page 19-113

### Table 19.347: Stainless Steel (302) NEMA 1 Flush Plates [4]

| No of Holes | Description   | Type |
|-------------|---|------|
| 1           | 1 Hole flush plate, cover screws, insulating liners | K25  |
| 2           | 2 Hole flush plate, cover screws, insulating liners | K26  |
| 3           | 3 Hole flush plate, cover screws, insulating liners | K27  |
| 4           | 4 Hole flush plate, cover screws, insulating liners | K28  |

KYG1Y (mushroom head not included)

K26

When ordering, add prefix 9001 to the catalog number.

Only KN200 series legend plates will fit upright on these enclosures with their long axis vertical. Includes 1" NPT threaded conduit opening.

<sup>[2]</sup> [3] [4]

To be used with a standard 2 x 3 in. general purpose switch box. A 2.5 in. deep switch box should be used if two Type KA contact blocks are mounted side by side. If two Type KA contact blocks are mounted in tandem, a 3.5 in. deep box should be used.

<sup>[5]</sup> 

Uses 9001K metal operators and metal legend plates.

Control Station consists of components that are UL listed for use in Class 1, Division 2, Groups A, B, C, or D. Uses 9001K metal operators and plastic legend plates.

<sup>[6]</sup> [7] [8]

Uses 9001SK plastic operators and plastic legend plates. Includes 1" NPT threaded conduit opening.

# Point of Purchase—PoP Products

Schneider Electric has recently expanded its line of Point of Purchase Blister Packs, comprised of 36 popular products, including: push-buttons, pendants, signaling and relay devices. These blister packs are conveniently packaged with all the associated components and accessories that you'll need to complete your installation. Point-of-Purchase packaging makes it easy for you, so you can just grab what you need and go!

# XVU 60 mm Diameter Tower Lights Description

The XVU tower lights are customer assembled products comprising:

- 1. Top cover (Black or Silver)
- 2. Buzzer unit (Black or Silver) [12]
- 3. Illuminated units: [13]
  - a. LED illuminated units (Colors: Green, Red, Orange, Blue, White or Yellow)
  - b. Multi-color LED unit (Colors: Green, Red, Orange, Blue, White or Yellow. Patterns: steady, blinking, flashing, or rotating)
- 4. Sound unit [14]
- 5. Body extender (Black or Silver)
- 6. DC body unit (Black or Silver)
- 7. AC body unit (Black or Silver)
- 8. Flexible mounting module
- 9. Direct mounting plate (Black or Silver)
- 10. 100 mm/3.937 in. pole with fixing plate (Black or Silver)
- 11. Height adjustment pole from 210 to 385 mm/8.268 to 15.157 in. [15]

#### Composition

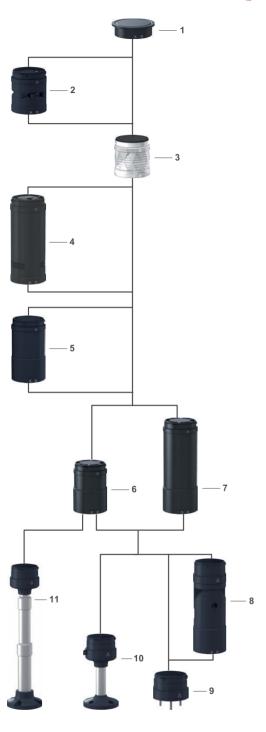

- XVU tower lights are customer assembled signaling units that are mounted on the body of the unit with a mounting accessory.
- Maximum of 5 illuminated units or 4 illuminated units with 1 audible unit can be assembled. The illuminated or audible unit [16], stack vertically.
- With the indicator marks on these units they can be easily assembled.
- Electrical connections between each unit are made automatically as they are mechanically assembled.
- The signaling units are identical in size and their positioning is unrestricted.

#### Mounting

Fixed into support panel using direct mounting plate, 100mm/3.937 in. pole with mounting plate or adjustment pole.

#### Cabling

By means of spring cage connection terminal block incorporated in mounting unit (Direct mounting plate, pole with plate, adjustment pole)

[15] Only for DC body unit

<sup>[12]</sup> Always mounted on the top

<sup>[13]</sup> Up to 5 LED illuminated units without sound module; Up to 4 LED illuminated units with sound module

<sup>[14] (3)</sup>Sound module can work without LED unit

<sup>[16]</sup> Sound module cannot be combined with buzzer unit at the same time.(5)

- (6)Only for use with DC body unit.

# **XVGU Multi-color USB Tower Lights**

The monolithic USB tower lights of the Harmony® XVGU range supports Magelis HMIs [23]. These tower lights with multi-color LEDs are unique and simple-to use as the states and patterns are directly set and modified in the HMI application.

The XVGU tower lights provide long distance indication of the operating status or sequences of a machine or installation, both visually by illuminated signaling units with 360° visibility, and audibly by a buzzer.

- The tower light comes with a pre-assembled USB cable for simple wiring and easy integration with the Magelis HMIs [23] [24]
- The tower light settings are selected from the Set screen of the HMI application at the time of integration.
- The multi-color LEDs on the three levels can be set to numerous color combinations (red, orange, green or blue) for sophisticated signaling.
- The 2-tone buzzer volume and alarm type (4 pre-recorded types) can be set easily.
- The tower lights allow to optimize your equipment: many customized configurations can be made from a sole product.
- The range involves Ø 60 mm/2.36 in. products and is therefore ideal for use in many activity sectors (textiles, packaging, baggage handling). It is also ideal for use with metal tools, plastic extrusion machines and assembly lines. This range is only for indoor applications

**NOTE:** Signaling colors correspond to a combination of 4 colors (red, orange, green, and blue) which can be set easily in the HMI application.

Harmony eXLhoist Operator Control Stations

The Harmony® eXLhoist range of wireless remote control systems provide complete and innovative crane operator control solutions to: improve the machine and crane operator efficiency, enhance safety for people and equipment, and to reduce installation and maintenance downtime.

The remote control system XARS is a combination of remote control device (or transmitter: XART) and base station (or receiver: XARB), which transmits commands and information from the operator to the machine and vice versa by a wireless transmission means.

The XARS system offers movement in 3 directions (for example: hoist, bridge, and trolley) at 2 speed levels (low and high) for each movement.

The 2 modes available in the system are:

- Single mode: the remote control device controls one base station
- Tandem mode: the remote control device controls 2 base stations simultaneously.

# **Type BW Pendant Stations**

Refer to Catalog 9001CT1001

# Type BW Pendant Stations and Accessories

This pre-assembled, two-button station now comes complete with internal and external strain relief. Oversized finger grips on the rear of the enclosure make it easy to grip and operate.

- · Well suited for standard hoist applications
- Push button legend inserts
- Field-installable mushroom button
- · Full cover gasket, to exclude harmful contaminants

ZB2BE10

XENG1191

XAC pendant stations are designed for standard- or medium-duty control circuit applications.

- · Single- or two-speed versions
- Double insulated
- · Shock and corrosion resistant
- 2, 4, 6, 8, 12 element versions
- · Ease of operation

XACA983

XACA982

Booted push buttons are for cover mounting only. All other operators can be mounted on cover or bottom.

Trigger action mushroom heads are tamper proof in that a change of contact state is not possible by teasing or floating the operator. [12]

Not for use with XENG contact blocks. [13]

see Table 19.402 Lamps, BA9s Base, page 19-129 and Table 19.403 LED, BA9s Base, page 19-129.

# Type XACA Worksheet

Use this worksheet to assist in component selection. Custom orders for XACA pendant stations must be placed through the Product Selector in Quote to Cash. There is a 10% charge for assembly.

# **XACA Order Guide Instructions**

Custom built pendant stations

- 1. Determine the number of operators needed, then choose an enclosure with a corresponding number of holes.
- Select the type of operator, contact block, and appropriate nameplate for each function required.
- Check for special functions that may be required. These items could include mechanical interlocks, adapters for self-supporting cable, lower support rings, protective guards, etc.

# **Pendant Station Application and Ordering Information**

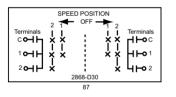

This line of pendant stations consists of polymeric enclosures (2 through 10 units), push button units (1 through 5 speed) and laminated legend plates. All enclosures have an extra single unit space near the top which permits the installation of a toggle switch, a Type SK operator or pilot light, or a warning label. All enclosures come with a stainless steel hanger bracket and internal strain relief post. Enclosures are yellow and have a threaded opening in the top.

- used with toggle switch
- 3 Tri-laminated legend plate having a yellow or red
- 4 19 characters each side.
- ▲ Class 9001 Type SK Push-To-Test Pilot lights and Remote Test Pilot lights will not fit in these enclosures.

AW132
Type AW with Oversized
Pedal Shield and Side Shields

AW117
Type AW with Oversized Pedal
Shield,
Side Shields and Safety Door

AW1 Type AW Foot Switch without Pedal Shield

6

Type AW Fully Shielded Foot Switch with Oversized Pedal Shield, Side Shields and Safety Door. The Safety Door is interlocked with the pedal to prevent operation due to shock or vibration. It prevents accidental pedal operation by requiring a simple but intentional motion to lift the door before inserting the foot.

Operating Temperature: -30 to +60 °C (-22 to +140 °F)

# Dusttight and Driptight Enclosure, NEMA 2, 4 and 13

# **A** DANGER

Heavy Duty Industrial Foot Switches—Oiltight, Watertight,

#### **HAZARDOUS APPLICATIONS**

Do not use foot switches on machines without point-of-operation protection.

Failure to follow these instructions will result in death, serious injury, or equipment damage.

#### **Foot Switch Selection**

Foot switches are used to control many industrial processes, while leaving the operator's hands free to perform other functions. The type or model of foot switch suitable for each application will vary depending on factors such as the control function required, degree of protection required, production methods, unusual conditions, government regulations, etc. In some applications more than one foot switch may be required, as when two or more persons are operating a machine. In these cases, safe practice and regulations require that the foot switches be wired in series making it necessary that each operator's foot switch be actuated before the machine will cycle.

Only the user can be aware of all the conditions and factors present during setup, operation and maintenance of the machine; therefore, only the user can determine which foot switch(es) can be properly used. When selecting a foot switch for a particular application, the user should refer to the applicable ANSI standards and OSHA regulations. The National Safety Council's Accident Prevention Manual also provides much useful information.

In some applications, such as power presses, additional operator protection such as point-of-operation guarding must be provided when a foot switch is used as an actuator. This is necessary since the operator's hands and other parts of the body are free to enter the pinch point area and serious injury can occur. The shielding provided on foot switches cannot protect an operator from injury. For this reason the foot switch cannot be substituted for or take the place of point-of-operation protection.

A Trilingual Danger Sign regarding the need for point-of-operation protection is supplied with each foot switch. The sign incorporates three languages: English, Spanish and French. Additional copies of the sign are available by contacting your Square D sales office.

For **replacement parts** for Class 9002 Type AW: See instruction bulletin 65013-010-31. Also see Table 19.411 Contact Symbol—Two Stage, page 19-135 and Table 19.412 Contact Symbol—Four Stage, page 19-135.

<sup>[1]</sup> When ordering, add prefix "9002" to the catalog number.

<sup>[2]</sup> WARNING: These foot switches must not be used to operate machines or equipment where the possibility of operator injury exists. Typical uses include Emergency Stop functions, "Dead Man" controls, signal functions (lights, bells, etc.).

<sup>[3]</sup> A single pole snap switch that contains two double break contact elements (1 N.O. and 1 N.C.) must be used on circuits of same polarity. A double pole snap switch contains two electrically separated sets of contact elements allowing use on circuits of opposite polarity. Each set that contains two double break contact elements (1 N.O. and 1 N.C.) must be used on circuits of same polarity.

<sup>[4] 2</sup> N.O. and 2 N.C. isolated, direct acting contacts

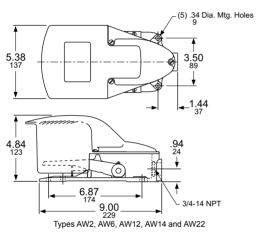

<sup>[5]</sup> For replacement cover drilled to accept latch. For Series C foot switches order AC9. No replacement cover available for Series A or B devices drilled to accept latch. AC8 is spring return only.

## Instructions for 9003K2 Key Sheet

The Key Sheet for ordering a 9003K2 cam switch is on page 19-137, and an example of a completed key sheet is on page 19-138. The instructions below are for filling out the key sheet on page 19-137.

- 1. Select the box for K2 (20 A).
- 2. Identify the Product quantity in the box provided.
- 3. Verify front mounting by selecting the box: Front Mounting.
- 4. If ordering a base/contact block only, select 22 mm plastic or 22 mm metal mounting. Then complete the following:
  - a. 3 Switching Angle (positions)
  - b. ④ Contact scheme and jumpers (pre-wired)
- 5. If ordering a complete switch (base/contact block, head, legend), check the box. Then complete the following:
  - . ① Operating head preference
  - ② Legend preference
  - c. 3 Switching angle (positions)
  - d. ④ Contact scheme and jumpers (pre-wired)
- 6. Operating head preference ① (identify the operating head preferred)
- 7. Legend preference ② (identify the legend preference)
- 3. Switching angle (positions) 3 and special legend marking
  - a. Identify whether the switch need is 30° or 60°, or 45° or 90° switching angle.
  - b. Fill in the legend markings desired at the positions indicated. Zero degrees is always straight up.
- 9. The rotation of the operator stops clockwise at the top or 0° position. If full rotation through 360° is desired, the Full rotation through 360° box must be checked.
- 10. Contact scheme and jumpers (pre-wired) ④
  - a. If jumpers are desired to be pre-wired, draw a horizontal line between the terminals to be jumpered per the example on page 19-138.
  - b. Refer to the Legend at the bottom of page 19-137 for contact sequences, i.e.: X indicates contact closure. See page 19-138 for examples of filling in this portion of the key sheet.
