Hubbell Solutions for Education Facilities

The need for technologically advanced, cost-effective, safe and long-lasting facilities has today's schools and universities faced with a new reality in planning and carrying out new and retrofit facility projects. Today's education facilities must take into account several factors during construction and renovation. From classrooms and learning spaces, to administration and facility operations, Hubbell Wiring Systems has the solutions to help education facilities meet these key challenges.

Effectively Delivering Power, Data and Audio/Video (AV)

Today's education facilities need to ensure effective power, data and AV delivery to support everything from online e-learning, interactive audio/video and multimedia video presentations, to real-time delivery of the latest research information and enhanced communication — all of which has become vital to modern teaching, learning and decision making.

Reducing Upfront and Long-term Facility Costs

When updating inadequate facilities, schools and universities need to reduce initial upfront and long-term costs by ensuring that projects are completed quickly and efficiently. At the same time, planning new and retrofit projects requires solutions that enable lower maintenance and operating costs over the life of the facility.

Maintaining Energy Efficiency and Sustainability

To further reduce operating costs, education facilities administrators and designers are thinking long-term, striving for energy efficiency. The use of energy-saving technologies including open space environments that increase daylight and data center designs for improving airflow are just some of the ways education facilities can ensure more energy efficient, sustainable facilities.

Ensuring Maximum Safety and Durability

Education facilities are demanding environments where maintaining safety for both students and staff is critical. New and retrofit projects therefore require devices that ensure safety, are durable and impact resistant to withstand everyday use, and provide reliable, long-lasting performance.

For more than 100 years, Hubbell has provided high-performance, reliable solutions for primary, secondary and higher education facilities. Only Hubbell has the comprehensive line of wiring devices to help today's educational facilities effectively deliver power and technology, reduce costs and ensure maximum safety.

Audio/Visual

Safety

Energy Savings

Sustainability

Durability

Primary and Secondary Education Facilities

Power, Data and Audio/Video Delivery

Technology is helping engage students, improve teaching, and facilitate communication. Hubbell's power, data and AV delivery solutions support everything from smartboards and projector systems, to computers and networking equipment.

- Multimedia Audio/Video connections and enclosures
- Copper and fiber network cable and connectivity
- Data center and cable management solutions

Installation Efficiency

Hubbell has a wide range of solutions specifically designed to provide efficient installation, deployment and replacement that ultimately help schools complete new and retrofit projects faster while reducing overall costs.

- Pre-connectorized wiring devices
- Plug-n-play AV assemblies
- Pre-wired raceway systems

Energy Efficiency

Modern education facilities incorporate new technologies such as energy efficient lighting controls, reducing energy consumption and costs.

- Wired and wireless ceiling and wall-mount occupancy sensors
- Daylight harvesting sensors
- Data center airflow management solutions

Safety and Durability

Students and personnel need to be protected from the hazards of electricity, while secondary educational facilities may encounter intentional or unintentional damage. To reduce risk, solutions need to provide reliable safety, protection and durability.

- Impact and tamper-resistant solutions
- GFCI, isolated ground and surge protection devices
- Weatherproof, watertight and locking devices

Universities and Continuing Education Facilities

Power, Data and Audio/Video Delivery

At the university level, advanced high-speed technology is broadening access through online courses, facilitating research, improving administrative operations, and attracting and retaining students.

- High-speed copper and fiber network solutions
- Advanced data center and cable management solutions
- Multimedia and audio/video systems

Installation Efficiency

With solutions that offer fast, efficient installation of power, data and AV connections, Hubbell enables today's college and university facility departments to maximize investments in building infrastructure during new and retrofit construction projects.

- Pre-fabricated, pre-terminated wiring solutions
- Pre-wired metallic raceway
- Plug-n-play data center solutions

Energy Efficiency

Many colleges and universities are striving for maximum energy savings and sustainability, as evidenced by the growing number of institutions acquiring various levels of LEED certification under the U.S. Green Building Council.

- Occupancy and daylight harvesting sensors
- Electric vehicle charging stations
- Data center space savings and airflow management

Safety and Durability

Residence halls and public spaces require solutions that prevent electrical shock and trip hazards, while harsh outdoor stadium environments, food service, and medical and science facilities require durable, reliable devices.

- Harsh environment and watertight devices
- Surge protection and motor disconnects
- Safe temporary power solutions

Today's classroom offers a new type of learning environment with educators using state-of-the-art smartboards, video conferencing, and multimedia technologies to engage students. At the same time, these frequently-used spaces require solutions that enable fast, efficient installations and provide cost-effective, safe learning environments for educators and students.

Power, Data and Audio/Video Delivery

Classrooms and learning spaces require comprehensive wall, ceiling and in-floor solutions that deliver power, data and AV to a variety of technology devices and equipment.

Installation Efficiency

When it comes to upgrading or installing new devices in classrooms, contractors and maintenance personnel need to get in and out of these spaces as quickly and efficiently as possible.

Tamper-Resistant Receptacles

Hubbell offers a variety of tamper-resistant receptacles that comply with NEC requirements that all 15A and 20A 125V receptacles shall be "tamper-resistant" in child care facilities and residencies.

RE-BOX® Remote Equipment Cabinet

RE-BOX® provides an efficient and organized enclosure to house patch panels and active equipment in classrooms to a remote telecom room.

Data and Audio/Video Connectivity

Hubbell's netSELECT® FPTV connection enclosure delivers high-density connectivity and power in the wall. In-wall connections allow flat panel displays and interactive smartboards to sit flush without dangling cords. It quickly installs to studs or sheetrock without additional components or hardware.

HDMI 110 UTP Extenders

Designed to provide aesthetically-pleasing access to video and audio, the 110 style connections transport 1080p video and flawless audio.

Administration offices have similar technology needs to classrooms, but are more focused on ensuring maximum productivity. Faculty and staff are using technology to improve communication, productivity and organizational development. These spaces also strive to conserve energy and are designed to be more aesthetically pleasing while offering a modern, more productive working environment for staff.

Offices • Conference Rooms • Break Rooms • Restrooms

Energy Efficiency

Energy saving H-MOSS® wall switches automatically turn off lights in vacant offices and conference rooms to reduce energy consumption while electrical charging stations support innovative hybrid and electric vehicles on campus.

Power, Data and Audio/Video Delivery

Reliable surge strips and receptacles keep equipment up and running while the delivery of power and data supports the proliferation of computers, access to systems and information, and enhanced communication.

Commercial Electric Vehicle Charging Stations (EVSE)

With the number of electric vehicles rapidly increasing, today's municipalities need to ensure they're making the right choice when it comes to charging stations. Today's charging stations must offer cost-effective installation, superior reliability, safety and ease of use, while also blending nicely into the surrounding environment for a more stylish, attractive appearance.

Hubbell Surge Protective Devices (SPDs)

A cascading approach is encouraged for optimal protection that includes surge protection at the service entrance, branch panel and the point-of-use. Hubbell offers a comprehensive offering of panel surge products, innovative surge strips, and the broadest surge receptacle offering in the industry.

With more information, classes and entertainment being delivered online, technology has become an integral component of student life. In fact, advanced technology is one of the most vital components for continuing educational facilities to attract students. At the same time, safe living environments are paramount to protecting students and reducing risk.

Power, Data and Audio/Video Delivery

Hubbell's wide range of voice, data and video connectors and plates are ideal for delivering internet access, entertainment, phone service and security systems to residence halls.

Safety and Durability

Frequent plugging in of electronics in these spaces requires durable wiring devices, while bathrooms, kitchenettes and other potentially damp areas need tamper and weather resistant GFCI receptacles to ensure protection of students.

Dorm Rooms • Common Areas • Kitchens • Restrooms

Tamper-Resistant GFCI Receptacles

The combination of GFCI protection and tamper-resistant safety provides an ideal "one-stop" Hubbell solution. Hubbell tamper-resistant GFCI devices also include a weather resistant rating per NEC® 406.8, providing UV and corrosion resistance.

Cafeterias • Kitchens • Book Stores • Student Lounge

Both primary and continuing education facilities include food preparation areas, requiring easy-to-use, safe and durable power connections that accommodate a variety of appliances. Today's education facilities also strive to deliver advanced technology to food service areas for Internet access, digital signage for displaying menus, entertainment systems, and point-of-sale registers.

Safety and Durability

Hubbell offers an array of ground fault and watertight devices that are ideal for use in kitchen and food service areas, as well as disconnect switches to safely shut-down larger machinery like dishwashers and exhaust systems.

Power, Data and Audio/Video Delivery

Flat panel TV enclosures are ideal for keeping cords hidden behind digital signage systems in cafeterias while HI-Impact enclosures protect equipment needed to deliver power, data and multimedia.

Flat Panel TV Enclosures

Hubbell's netSELECT® FPTV in-wall connection enclosure allows flat panel displays and interactive smartboards to sit flush without dangling cords. It quickly installs to studs or sheetrock without additional components or hardware.

Stainless Steel Data Plates

Stainless steel plates are designed for flush mounting of Hubbell connectivity providing corrosion resistance from frequent washdown.

Education facilities typically include auditoriums and performing arts centers for a variety of learning and entertainment activities including band performances, plays and general assemblies, or large-scale seminars, theatre productions and award ceremonies. These spaces must accommodate the latest audio-visual technology for presentations while providing maximum reliability to ensure that the show goes on.

Power, Data and Audio/Video Delivery

From access to multimedia applications at the presenter's podium on stage, to projection, lighting, curtain and sound systems, these spaces require a variety of power and low-voltage systems.

Safety and Durability

Twist-Lock® devices and single-pole plugs maintain reliable power connections to prevent performance interruptions while wire mesh grips and cable protection systems maintain the integrity of electrical cords, cables and conduit.

Lecture Halls • Conference Rooms • Gymnasiums • Auditoriums

Twist-Lock® Devices

Insulgrip® Twist-Lock® devices available in 20A and 30A maintain Hubbell's classic integrity, solid construction and safety features that make these the "Industry Standard". The plug and connector feature a powerful cord grip, and nylon body and housing for impact resistance.

Additional Products of Interest

Pro-Audio

Hubbell's pro-audio connectors including XLR, quarter inch, SPEAKON®, data USB and 1394. Type S connectors mate with Hubbell iSTATION modules allowing each device to mount into Hubbell delivery, workstation and panel solutions.

High Amp Straight Blade

Hubbell offers a complete line of heavy duty 30, 50 and 60 Amp devices. Captive Allen head terminal screws permit high torque and clamping pressure required for larger size conductors used in copier, range and dryer applications.

IEC Pin & Sleeve

Provide safe and dependable performance in the most demanding environments. Heavy duty non-conductive nylon construction provides impact and corrosion protection. Pin & Sleeve devices are available in 20A 600V to 100A 600V.

Safety and Security

Single pole devices are the right choice for supplying temporary electrical power distribution to numerous applications. Single pole devices have been designed with ease of assembly and disassembly in mind, no special tools are required.

Wire Securedness and Strain Relief

Hubbell wire mesh grips are designed to prevent strain from being transmitted to joints and terminals on electrical cords, cables and conduit. This provides greater security than using a fitting alone, making electrical systems safer by preventing cable pull-out and controlling cable arc-of-bend.

Kellems® Grips

Single Eye, Closed Mesh**

For permanent support when cable end is available to be installed through grip.

Computer Labs • Science Labs • Research Labs

Whether it's the typical high-school science lab, or a more sophisticated university research facility, science and research laboratories require an array of solutions to deliver power and technology where it's needed. These spaces can also be exposed to corrosive chemicals and wash downs, requiring extremely durable product solutions designed to withstand harsh environments.

Power, Data and Audio/Video Delivery

Hubbell's complete line of metal and non-metallic raceway is optimal for delivering power and technology to the point of use in laboratories while offering maximum flexibility for changing needs.

Safety and Durability

Hubbell's complete line of GFCI and duplex receptacles maintain reliable power and safety in harsh laboratory environments, while stainless steel plates resist oxidation and corrosion.

Pre-Wired Raceway Systems

- Hubbell Pre-Wired Raceway saves time and money by completing the job quicker and on schedule
- Local and factory support available to assist in defining bills of material
- Raceway ducts are kitted, labeled and shipped by room, area or floor locations

Data centers are the very core of education facilities, supporting all the applications needed for daily communications and Internet access, management and storage of administration and student records, and the delivery of advanced learning technologies. These spaces house a wide range of highly critical networking equipment, yet are also faced with increased power consumption and cooling challenges.

Power, Data and Audio/Video Delivery

From efficient power distribution and network cable management, to advanced copper and fiber cable and connectivity, Hubbell has the solutions to support the latest high-density networking applications.

Energy Efficiency

Hubbell cabinets and cable management optimize airflow for more efficient cooling and reduced energy consumption while pre-terminated solutions save space and reduce waste.

Branch Panel Surge Protection

Hubbell SpikeShield® service entrance and branch panel surge protection devices reliably handle peak amperage capacity of 40kA to 320kA. They can be easily installed next to the panel to prevent over voltage that can impact sensitive data center equipment and mechanical systems.

Delivering safe, convenient power and multimedia to rugged indoor athletic arenas or harsh outdoor stadium environments poses a challenge for both primary and continuing education facilities. From maintaining spectator safety to providing power and voice, data, and video connections, Hubbell's winning combination is essential to maintaining state-of-the-art athletic facilities with real-time transmission of sporting events.

Power, Data and Audio/Video Delivery

Hubbell's SPIDER® Temporary Power Distribution system incorporates the latest devices for reliably delivering safe, temporary power to a variety of equipment and lighting systems needed for outdoor events.

Safety and Durability

Hubbell's watertight devices maintain safe, reliable power at outdoor events, even when it's raining. In the event of pedestrian and vehicular traffic, Hubbell cable and hose protection systems prevent trip or shock hazards.

Indoor Gymnasium • Outdoor Field • Playgrounds • Concessions

SPIDER® Temporary Power Distribution

Outdoor events need to ensure maximum safety when providing temporary electrical power for equipment and lighting, especially since these applications involve frequent plug-ins and disconnects.

Additional Products of Interest

Hubbell Copper Solutions

Designed to exceed all applicable standards for performance and reliability, Hubbell copper solutions offer a fully integrated system of copper cabling and components.

Single Pole

Hubbell's Single Pole connectors are made from a specially formulated thermoplastic elastomer that resists cracking in cold, hot or oily conditions as well as any other harmful environments. The connectors have been designed so they are easy to assemble, requiring no special tools.

Fiber Cable

Hubbell's full line of indoor and outdoor fiber cables supports a variety of rugged deployment applications, delivering high speed fiber optic service to remote locations. Interlock armored indoor cable is available for direct building deployment without the need for inner duct tubing. Loose tube outdoor fiber cable, available in armored or non armored, is a rugged gel-free construction suitable for direct burial between facilities.

Safety and Security

Exposed cables, cords and hoses can be a trip hazard for pedestrians, as well as a potential shock hazard. Hubbell offers a variety of hose and cable protection systems that provide a safe ramping system for both pedestrian and vehicle traffic. Heavy-duty, medium-duty and ADAAG compliant systems are available.

Secondary education facilities often have their own medical centers and health services for students, including on-site clinics and sports rehabilitation/physical therapy centers. Medical centers also require data connections to manage student medical records. In addition, many sports rehab/physical therapy centers use hydrotherapy, requiring nearby connections to have ingress protection against water.

Installation Efficiency

While Hubbell Hospital Grade and Tamper-Resistant Receptacles are put through comprehensive rigorous testing to accommodate abrupt plug removal and impact, they are also quick and easy to install.

Power, Data and Audio/Video Delivery

Hubbell's data, audio and video connectivity support digital imaging and electronic medical records while higher capacity 50 and 60 Amp power devices deliver power for diagnostic equipment.

Nurse's Office • Medical Centers • Imaging • Walk-In Clinics

Hospital Grade Receptacles

Hubbell understands that healthcare is where safety, reliability and performance matters the most. These devices feature exclusive nickel-plated bypass power contact design to ensure uninterrupted power and a four-point grounding system for low resistance to fault currents.

Additional Products of Interest

Wall/Ceiling Duct System

The Hubbell Wall/Ceiling Duct System is utilized in combination with Hubbell's Trench Duct product offering for the enclosure of wiring to X-Ray machines or MRI equipment. Hubbell's aluminum wall duct is used for applications that require non ferrous metal raceways. Wall Duct is available in flush mount and surface mount versions.

Trench Duct System

The Hubbell Trench Duct System is utilized as an in-floor feeder for the Hubbell Wall Duct product line in hospital and other radiology facilities. Trench Duct can also be utilized as a stand-alone wire management system in retail store and general commercial applications.

Hubbell Switches and Illuminated Switches

Hubbell Toggle Switch's heavy duty nylon toggle resists abuse while the Hubbell Decorator Switch's thermoplastic rocker assures quiet operation and precise timing. One piece rivetless copper alloy spring contact arm and terminal plate provides long life.

Personnel Protection

Outpatient healthcare facilities within an institution require the same level of performance as hospitals. Medical care centers and walk-in clinics require the safety and convenience of tamper-resistant receptacles. Hubbell tamper-resistant receptacles restrict improper access to energized contacts.

Every education facility includes mechanical and maintenance areas that typically encompass a wide range of equipment like back-up generators, HVAC units and air handlers that need high-capacity, safe, and reliable power. Without it, an entire school or university can shut down. Mechanical and maintenance personnel also strive to keep energy costs down throughout education facilities.

Safety and Durability

From CIRCUIT-LOCK® disconnect switches and interlock enclosures, to portable cords and cable management, Hubbell offers a variety of devices to provide safe, reliable power and control for mechanical equipment.

Power, Data and Audio/Video Delivery

With wireless and network communications now the norm, all personnel within an education facility require access to these services. Hubbell's Wireless Access Point Ceiling Boxes are ideal for delivering wireless service in remote mechanical and maintenance areas.

Maintenance Rooms • Boiler Rooms • HVAC • Trade Schools

IEC Mechanical Interlock Enclosures

Hubbell's revolutionary CIRCUIT-LOCK® interlock enclosure incorporates the disconnect switch and IEC receptacle in one compact unit. At the same time, it eliminates the possibility of making or breaking the circuit under load or making a casual or lazy connection.

Disconnect Switches for Use with Variable Frequency Drives

Hubbell's Disconnect Switch for Variable Frequency Drives (VFDs) prevents downtime from out of sequence equipment shutdowns. The HBLDS3VFD integrates a verified break before break auxiliary contact factory installed in the HBLDS3 30 Amp disconnect switch enclosure that interfaces directly with VFDs.

Application Guide

Scan to watch the Hubbell Education video.

Visit www.hubbell-wiring.com to access Hubbell's Education Solutions website.

Hubbell Installation Efficiency Product Solutions

Pre-Wired Raceway

Available in aluminum, steel and non-metallic versions, Hubbell's pre-wired raceway systems will keep your projects on schedule, reduce on-site labor and waste. Our local sales team is available to support your efforts.

CONNEXION

Hubbell CONNEXION Zone Distribution System is a factory assembled modular plug-n-play system that delivers power and data to the workstation in raised floor installations.

Pre-Fab Solutions

Pre-fab solutions can reduce projects by as much as 30% while reducing on-site waste. The Rough in Ready Pre-Fab solution offered by Hubbell provides a variety of options from innovative bracket to cable-ready assemblies.

SNAPConnect® Modular Devices

Hubbell's SNAPConnect® offers the latest in innovative design, to save time and money, while delivering a safe, reliable and durable connection. SNAPConnect® reduces labor costs during the initial installation and also provides future labor savings if device replacement or upgrade is ever required.

Hubbell Energy Efficiency Solutions

Sensors

Reduce energy consumption in a wide variety of commercial, residential and industrial applications with Hubbell lighting controls and sensors.

Hubbell's sensors facilitate compliance with the latest building codes and standards, including ASHRAE/IESNA 90.1, CEC's Title 24, and help obtain LEED® points.

Commercial Electric Vehicle Charging Stations

PEP Stations (EVSEs) are exclusively represented by Hubbell. EVSEs are an ideal fit for commercial property electric vehicle charging requirements. Their distinctive styling provides property owners with a design that is complimentary to building architecture and supports a commitment to reducing emissions.

Power Strips

Hubbell's SpikeShield® Energy Saving Surge Protective Devices (ESPS Series) reduce power consumption by eliminating phantom power draw of unused electronics and appliances.

Hubbell offers a complete offering of power strips in various levels of outlet configurations and surge protection.

Literature Support

Hubbell offers an extensive literature library for product support. Downloadable PDFs are available online at www.hubbell-wiring.com under the media tab.
