

Advantage

- Patented Punch Down of all Four Pairs in One Punch
- Reduces Termination Time by 75%
- Consistent, Reliable Termination Every Time
- RoHS Compliant

FEATURES

- Interchangeable heads: provides ease-of-use with just one tool (jack, panel, block)
- Comfortable, ergonomic tool handle
- Polarized tool head, eliminates confusion

SPECIFICATIONS

- High impact handle with ergonomic grip
- Common handle for HJ, XJ, 5-pair block and Cat 6/6A panel
- Replaceable blades and cartridges (blades included)

OPERATION

The 1-punch tool makes punching down a Hubbell jack quick and easy. Five easy steps get the job done.

1
Lace the jack and place in a Hubbell termination aid. Always use this tool with a termination aid.

2
Align the head of the punch down tool over the target jack with the slots of the tool head ready to slide onto the shoulder of the jack nose.

3
Place the punch-down head onto the Hubbell jack.

4
With one hand, hold the termination aid. With the other, depress the handle completely until the tool cycles impact.

5
Remove the tool head from the jack and inspect the jack. Install stuffer cap onto the termination towers.

1-Punch Jack Termination Tool

The 1-punch tool is a unique punch-down tool for UTP cabling. It is designed to punch down all four pairs consistently and cut off all conductors in "one punch". This tool saves valuable installation time over traditional single-blade tools that require multiple cycles.

This tool should be used exclusively with Hubbell's HJ and XJ Series jacks. Additionally, it is necessary to use this with the Hubbell Premise Wiring Jack Knuckles termination aid (Catalog No. HXTA).

1-PUNCH JACK TERMINATION TOOL

The 1-punch XJ tool and Hubbell jacks are made for each other. This tool should be used exclusively with Hubbell jacks. Additionally, it is necessary to use this with the HXTA termination aid.

| Description | Catalog No. |
|---|-----------------|
| 1-punch XJ tool w/ head, blades, termination aid | TX4P |
| 1-punch XJ replacement head (includes blades) | TX4PH |
