Hubbell's Circuit-Lock® Manual Motor Controllers

"Suitable as Motor Disconnects

Hubbell manufactures one of the most complete lines of motor disconnects on the market. Designed to ensure maximum reliability and performance, Hubbell Circuit-Lock® motor controllers meet or exceed all industry requirements. Because our Circuit-Lock® motor controllers are also disconnects, they ensure safety, compliance, flexibility and productivity for today's industrial and commercial environments. Whether controlling motor loads, safely terminating power or isolating equipment, Hubbell has the solution for you—no matter what the environment or application.

Hubbell Safety

Safety of personnel and equipment is paramount in any manufacturing environment. Hubbell Circuit-Lock® motor controllers withstand short circuits and provide a high degree of safety across the factory floor. Disconnect Switches for Variable Frequency Drives (VFDs) safely terminate power to prevent risk of injury and damage to highperformance output devices used for controlling today's conveyor systems.

Hubbell Flexibility

With Hubbell's wide range of Circuit-Lock® motor controllers and disconnects that offer several mounting options, NEC® line of sight requirements are easily achieved at the equipment or on the wall in virtually any industrial environment. Switches with a compact footprint, a variety of NEMA® type enclosures and plug-and-play LINKOSITY® make switch placement easier and more flexible than ever.

Hubbell Compliance

Compliance with codes and regulations is a must in any industrial environment. Hubbell motor controllers meet a variety of requirements, including OSHA lockout/tagout, NSF certification for hygiene and hazardous location ratings. Each Circuit-Lock® motor controller is UL listed as "Suitable as Motor Disconnect". The NEC® allows for the disconnect and controller to be in one unit.

Hubbell Productivity

Circuit-Lock® keeps assembly lines, goods and services moving. By offering a dual motor controller-disconnect rating, power can be safely terminated at any point in the circuit to perform maintenance on a single motor without shutting down the entire line. With the plug-and-play LINKOSITY® power system, MotorQuick® reduces motor change-out time by more than 65% to get equipment up and running faster.

Variable Frequency Disconnects

Each Controller is Also a Disconnect

NEC® is a registered trademark of the National Fire Protection Association (NFPA).

NEMA® is a registered trademark of the National Electrical Manufacturers Association.

Labelless Circuit-Lock® 30, 60, and 100 Ampere Unfused Disconnect Switches

NEC section 430.102(B) requires each motor controller to have a disconnect within line of sight from the motor and driven equipment. NEC section 430.109(A)(6) recognizes that a manual motor controller and disconnect can be the same unit, provided it has been tested for this purpose. Hubbell's Circuit-Lock® Unfused Disconnect Switches are UL listed as a manual motor controller and also "suitable as a motor disconnect" and meet these code requirements. In addition, the enclosure offers the ability to lock directly wired motor loads in the OFF position to comply with OSHA Lockout/Tagout regulations. This safety enclosure is Type 4X (Wash down, Corrosion resistant) IP69k and is also suitable for use with metallic conduit. The switch is mounted on an internal frame that is integral with the enclosure and bonds all grounds, and it accepts auxiliary contacts that can be used to signal PLC controllers.

Product ratings are laser-marked into the device and will not wash off for permanent identification

Stainless steel hardware for corrosion resistance

Three molded-in conduit drill points are located on the top, bottom, and back surface of enclosure

Labelless Circuit-Lock® Unfused Disconnect Switches are available in 30, 60 and 100 Amp, 600V AC ratings.

Auxiliary contacts are available for control circuit applications including the ON/OFF control of pilot lights or signal for programmable controllers.

Conduit hub and adjustable mounting feet are supplied for ease of installation.

Plug and Play Technology

MotorQuick® significantly reduces the time it takes to replace motors by combining the plug-and-play technology of the LINKOSITY® power system with the versatility of Circuit-Lock® motor disconnect switches. Quick disconnect terminations will reduce motor changeout time by aproximately 65%. Keeping spare motors

already pre-wired with a LINKOSITY® inlet enables wiring to be done off-line when it is convenient, not critical. Motor rotation can be pre-checked in a maintenance shop to further speed the installation. The net result is that equipment is up and running in a fraction of the time, helping improve the bottom line.

Circuit-Lock® 30 and 60 Ampere Fused Disconnect Switches

The Circuit-Lock Fused Disconnect Switch provides fused switched control of a directly wired load. The switch cannot be turned ON unless the enclosure cover is closed. The fuses cannot be accessed until the switch is turned OFF. The fuse holder accepts Class "J" fuses. This enclosure is non-metallic and is listed for Outdoor/Indoor (Type 4X Wash down, Corrosion resistant). The handle can be locked in the OFF position to comply with OSHA Lockout/Tagout regulations.

Conduit hub and adjustable mounting feet are supplied with each Circuit-Lock® Fused Disconnect Switch.

Stainless steel ¼ inch turn door fasteners for quick, easy access to fuses.

Enclosure door can be locked to prevent unauthorized access. Additionally, if the switch is ON, the door cannot be opened.

Compact Fused Disconnect Switch accepts Class "J" fuses. Fuse holders are top mounted for easy access. The switch accepts auxiliary contacts for control circuit applications including the ON/OFF control of remote pilot lights or signal for programmable controllers.

Valox® is a trademark of SABIC Innovative Plastics, acquired from General Electric Company.

Hazardous Location Non-Fused Disconnect Switches

Hubbell's hazardous location line of non-fused disconnect switches are typically used for applications with the presence of flammable gasses or vapors, ignitable dusts and fibers. They are also suitable for use in outdoor or indoor damp, wet and dirty locations or in areas where frequent wash downs, heavy rain, or water spray routinely occurs. These switches are compact in size to reduce cost and make it easier to position on the wall or piece of equipment. The enclosures are made of copper-free aluminum and have a polyester/epoxy finish to prevent corrosion. The high visibility handles can be locked out to comply with OSHA lock out/tag out regulations.

Copper-free aluminum construction with electrostatically applied polyester/epoxy finish to prevent corrosion

Compact NEMA 4X enclosure and footfrint allows easy installation in tight locations

- 316 Stainless steel bolts
- Top and bottom drilled and tapped conduit entrances
- For use as motor disconnects

Class I, Div. 1 & 2, Groups B,C,D Class I, Zones 1 & 2, Groups IIB+ H2, IIA Class II, Div. 1 & 2, Groups E,F,G Class III, NEMA 3, 4, 4X, 7(B,C,D), 9(E,F,G)

Lockable handle to meet OSHA Lockout/Tagout regulations

Large visible rotary handle with '
"On-Off" indicator allows a quick means of disconnecting power

HBLB7NFD26A

Lockable handle to meet OSHA Lockout/Tagout regulations

Features

- Compact size enclosures provide application flexibility with cost savings over industry standard sizes.
- Fewer cover bolts reduces installation and maintenance time.
- Gasketed flange with O-ring located inside bolt circle to seal out moisture.
- Rotary handle style operating mechanism with lockout provision as standard.
- Removable ductile mounting lugs adjust to irregular mounting surfaces.
- Bodies have top and bottom drilled and tapped conduit entrances for power connection.
- UL98 certified switch.

Applications

- Grain manufacturing and storage
- · Industrial chemical and gas manufacturing
- Petroleum refining
- Fertilizer manufacturing
- Vehicle repair/paint shops
- Coal mining
- Cotton and fabric mills

Standard Materials/Finish

- Enclosures: Copper-free aluminum (less than 4/10 of 1% copper content)
- Cover Bolts: 316 Stainless Steel
- O-Ring Gasket: Silicone
- Finish: Grey Powder Polyester painted exterior, electrostatically applied
- Ratings: 600V AC, 230V DC 30-100 Amp

Circuit-Lock® controllers rated "Suitable as Motor Disconnect"

The most complete offering of controllers with top horsepower and high amperage ratings in such a compact device.

#10 Brass Terminal Screw

Clamping plate for secure back or side wiring (30A only)

Optional Side Guard

For close wall applications and finger safe environments

30A, 40A and 50A

Shared Features

Strong on/off action with quick-make, slow break operation

- Provides long-life reliability
- 10,000 Amp High Fault Short Circuit Withstand Rating

Thermoset Body

- Provides high resistance to electrical arc tracking
- Withstands high temperatures
- Excellent dimensional stability
- Superior dielectric strength

Front and Back Wiring

Steel Screws and Copper Terminals

Recessed Wiring Wells

Finger safe environments

Optional Side Finger Guards

For close wall applications and finger safe environments. For 30A, 40A and 50A controllers.

Four Large Silver Alloy Contacts per Pole

- Excellent conductivity
- Maximum longevity

100% Copper Contact Arm

- High heat management
- Reliability

Lubrication-Free Controller

• Continued on/off cycling even in harsh, dust and high heat environments

600V AC Manual Motor Controllers/Disconnects

For use in almost any industrial environment. Ideal component switch for motor control and as a disconnect. Toggle controllers can be built into equipment and enclosures for either box or panel-mount installation.

| 85A, double pole, single throw, AC manual motor controller, black nylon handle, back wired. | HBL7882D |
| 85A, three pole, single throw, AC manual motor controller, black nylon handle, back wired. | HBL7883D |

Note: See page F-17 for technical information.

Motor Controller Accessories

| Description | Catalog Number |
|--|----------------|
| Finger Guards, fit 30A, 40A and 50A controllers. | HBLFG30 |
| Auxiliary Contacts, NO/Common/NC, for use in rotary switches only. | HBLAUX |

HBL16R93D

HBL16S63D

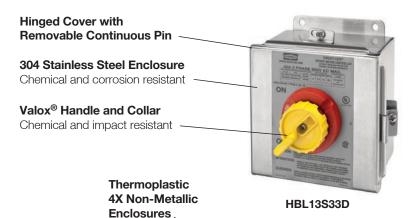

"Suitable as Motor Disconnects"

Shared Features

Un-drilled case allows custom placement of wire entry

Switch can be locked in the off position as a method of compliance with OSHA lockout/tagout

Poured in Closed Cell Neoprene Gasket

Interlocking Shaft and Handle

Prevents cover removal when switch is on

Up to 2 Optional Auxiliary Contacts

For PLCs and external indicators

Circuit-Lock® NEMA 4X Enclosures with Switch and Accessories

HBL16S63D HBL13X33D

Ideal for use in environments where wash-down is necessary, i.e. food processing, laboratories, etc.

CPB Series Compact Pendant Stations, Two Button, NEMA 4X

| Description | Catalog Number |
|--|----------------|
| Single-speed normally open-normally closed without mechanical interlock. | CPB20 |
| Single-speed with mechanical interlock between pushbuttons. | CPB21 |
| Two-speed with mechanical interlock between pushbuttons. | CPB22 |

Note: Included with product: nylon cord grip and sealing washer (must be installed to achieve NEMA 4X rating). Indication label pack. Cord dia. range .375–.625 in. (9.5–15.9)
Ambient temperatures: 25°F to 140°F (32°C to 60°C).

Typical applications: Package electric motor hoists. Remote control of machinery.

Contact Ratings, CPB Series

| Single-Speed | Voltage | Current |
|--------------|---------|---------|
| AC | 120V | 6A |
| 35% PF | 240V | 3A |
| DC | 125V | 1.1A |
| IND | 250V | .55A |
| Two-Speed | Voltage | Current |
| AC | 120V | 3A |
| 35% PF | 240V | 1.5A |
| | | |

Replacement Inserts

When the insert switches are in need of replacement, simply unplug the old insert and plug in a new one.

| Description | Catalog Number |
|---|----------------|
| Single speed insert momentary N.O. and N.C. | PG2 |
| On-Off insert (no mechanical interlock). Momentary, start-stop, reset-stop. | PG6 |
| 2 or 3 speed insert, momentary. Used to a maximum of 3 speed points. | MS2 |
| 5 speed insert, momentary. Used to a maximum of 5 speed points. For five speed applications replace an existing terminal board with the TB5 terminal board and replace an existing insert with the five speed (MS5) insert. | MS5 |

Conversion Inserts

In addition to single speed and two speed applications, pre-assembled units can be adapted to handle other applications.

| Description | Catalog Number |
|---|----------------|
| Terminal board, required for each insert switch PG2, PG6 and MS2. | TB2 |
| Terminal board, required for insert switch MS5. | TB5 |

Accessories

| Description | Catalog Number |
|--|----------------|
| Indicator labels for replacement package contains 1 each: hoist, trolley, bridge, forward-reverse, raise-lower, in-out, right left, east-west, north-south, reset-stop, start-stop, power, main hoist, auxuliary hoist, on-off, up-down. | PBSLP |
| Rubber button cover for replacement purposes. | PBSBC |
| 120V red pilot light for 4, 6, and 8 button units only. | PBSPL1* |

Note: *Each pendant station can accommodate one of the pilot light in the 1.20 in. (30.6) diameter mounting hole.

Kellems® Deluxe Aluminum Cord Fitting

Outdoor or indoors where subject to moisture, splash or submersion. Kellems grips provide strain relief for multi-conductor cable.

| Description | Cord Range | Catalog Number |
|---------------|-------------------------|----------------|
| Kellems grip. | .750"875" (19-22.2) | 07401023 |
| Kellems grip. | .875"-1.00" (22.2-25.4) | 07401025 |
