

Preventa safety modules

For coded magnetic switch monitoring
XPSDMB, XPSDME

Catalog

October **2015**

How can you fit a 6000-page catalog in your pocket ?

Schneider Electric provides you with the complete set of industrial automation catalogs all on a handy USB key for PC or in an application for tablets

Digi-Cat, a handy USB key for PC

- > Convenient to carry
- > Always up-to-date
- > Environmentally friendly
- > Easy-to-share format

Contact your local representative to get your own Digi-Cat

e-Library, the app for tablets

If you have an iPad®:

- > Go to the App Store and search for e-Library
- > or scan the QR code

If you have an Android tablet:

- > Go to the Google Play Store™ and search for eLibrary
- > or scan the QR code

General contents

Preventa safety modules

For coded magnetic switch monitoring

- **Type XPSDMB,
For coded magnetic switch monitoring**
 - Operating principle,
 - References page 4

- **Type XPSDME,
For coded magnetic switch monitoring**
 - Operating principle,
 - References page 5

- **Product reference index**
 - Index page 6

Operating principle

Safety modules **XPSDMB** are specifically designed for monitoring coded magnetic safety switches. They incorporate two safety outputs and two solid-state outputs for signalling to the process PLC. Conforming to Performance Level PL e/Category 4 conforming to EN/ISO 13849-1, modules **XPSDMB** can monitor two independent sensors. To monitor a higher number of magnetic switches using these safety modules, the magnetic switches can be connected in series parallel.

- Safety modules **XPSDMB●●●●P** incorporate removable terminal blocks, thus optimising machine maintenance.
- To aid diagnostics, the modules have LEDs on the front face which provide information on the monitoring circuit status.

Maximum achievable safety level

- PL e/Category 4 conforming to EN/ISO 13849-1
- SILCL 3 conforming to EN/IEC 62061

Product certifications

- UL
- CSA
- TÜV

Operating principle

Safety modules **XPSDME** are specifically designed for monitoring coded magnetic safety switches. They incorporate two safety outputs and two solid-state outputs for signalling to the process PLC. Conforming to Performance Level PL e/Category 4 conforming to EN/ISO 13849-1, modules **XPSDME** can monitor up to six independent sensors.

To monitor a higher number of magnetic switches using these safety modules, the magnetic switches can be connected in series parallel.

- Safety modules **XPSDME●●●●P** incorporate removable terminal blocks, thus optimising machine maintenance.
- To aid diagnostics, the modules have LEDs on the front face which provide information on the monitoring circuit status.

Maximum achievable safety level

- PL e/Category 4 conforming to EN/ISO 13849-1
- SILCL 3 conforming to EN/IEC 62061
