## Circuit Breaker Availability

Table 11.1: Circuit Breaker Availability

| Series of Cat. No. | Frame Size | Volts | Poles | Amperes | Availability |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  | Obsolete No Longer Available | Obsolescent |
| 115A-130A | MO-1 (Add-on) | 120 Vac | 1 | 15-30 | X |  |
| 215A-250A | MO-2 (Add-on) | 120/240 Vac | 2 | 15-50 | X |  |
| 215B-250B | MO-2B (Add-on) | $120 / 240 \mathrm{Vac}$ | 2 S.P. | 15-50 | X |  |
| 70000 | Multi-Breaker | 120 Vac | 4 S.P. | 15-50 | X |  |
| 111600 | MO-2 | 120/240 Vac | 2 | 15-30 | X |  |
| 131600 | MO-2 | 120/240 Vac | 2 | 15-30 | X |  |
| 151101 | MO-1 | 120 Vac | 1 | 15-30 | X |  |
| 151600 | MO-2 | 120/240 Vac | 2 | 15-30 | X |  |
| 161101 | MO-1 | 120 Vac | 1 With SN | 15-30 | X |  |
| 161600 | MO-2 | 120/240 Vac | 2 With SN | 15-30 | X |  |
| 161700 | MO-2 | $120 / 240 \mathrm{Vac}$ | 2 S.P. | 15-30 | X |  |
| 260000 | MB (Left-hand) | 120 Vac | 4 S.P. | 15-50 | X |  |
| 270000 | MB (Right-hand) | 120 Vac | 4 S.P. | 15-50 | X |  |
| 460000 | MO-8 | $120 / 240 \mathrm{Vac}$ | 4 S.P. | 15-50 | X |  |
| 470000 | MO-4 | 120/240 Vac | 4 S.P. | 15-40 | X |  |
| 480000 | MO-4 (Plug-in) | 120/240 Vac | 4 S.P. | 15-50 | X |  |
| 940000 | LM | 600 Vac | 2-3 | 125-800 | X |  |
| 950000 | 50 A Form W | 250 Vac | 1,2,3 | 15-50 | X |  |
| 951000 | 50 A Form W | 250 Vac | 2,3 | 15-50 | X |  |
| 952000 | 50 A Form W | 250 Vac | 2, 3 | 15-50 | X |  |
| 953000 | Flip-on Form W | 230 Vac | 1,2, 3 | 15-50 | X |  |
| 954000 | 100 A Form W (Trip Unit) | 250 Vac | 2, 3 | 50-100 | X |  |
| 955000 | 100 A Form W | 250 Vac | 2, 3 | 50-100 | X |  |
| 956000 | 225 A Form W | 250 Vac | 2,3 | 70-225 | X |  |
| 957000 | $400 \mathrm{~A}(\mathrm{KL})$ Form W | 250 Vac | 2, 3 | 125-400 | X |  |

## F-Frame CIrcuit Breakers

NOTE: FC circuit breakers are obsolete. Please refer to Digest for PowerPact ${ }^{\text {TM }}$ molded case circuit breakers for new installations or replacement.
Thermal-magnetic molded case circuit breakers shown on page 11-7 are permanent trip UL Listed, CSA Certified, IEC rated, and also meet the requirements of Federal Specification W-C-375B/GEN as indicated in Digest Section 7.
NOTE: Consider using PowerPact circuit breakers for situations requiring circuit breaker accessories. See Digest Section 7 for more information.

[6] UL magnetic trip setting tolerances are $\pm 25 \%$ for low and $\pm 20 \%$ for high from nominal value shown.
[8] 2 P and 3 P circuit breaker catalog numbers are completed by adding the required phase connection letters as a suffix. See Phase Options Table.
[9] Walking Beam Mechanical Interlock requires 2 circuit breakers with WB suffix, 1 walking beam assembly and 1 mounting pan.
[10] Fully enclosed interlocked units are available in Type 1 and Type 3R enclosures, with two neutrals provided in each enclosure. The completely enclosed assembly is not UL Listed. Contact the nearest sales office for more information.

Accessories see page 11-30
Optional Lugs see page 3-26
Dimensions see page 3-29
Enclosures see Digest Section 7

## L-Frame Molded Case Circuit Breaker

NOTE: Consider using PowerPact ${ }^{\text {TM }}$ circuit breakers for situations requiring circuit breaker accessories. See Digest for more information.

Microloigc Standard-Function Trip Systems (LXL, LXIL)

Micrologic Full-Function Trip Systems (LEL)

## Standard-Function Features:

- $80 \%$ rated
- True RMS sensing
- Interchangeable rating plugs
- LSI, LS(I)G, trip configurations
- Short-time delay $=12 \mathrm{t} \mathrm{IN}$ and ground-fault delay $=12 \mathrm{t}$ OUT
- Integral ground-fault testing
- LED long-time pickup indication
- Thermal and magnetic backup protection
- Long-time and ground-fault memory
- Optional local trip indicators-overload, short circuit, ground-fault
- Optional local ammeter/trip indicator
- Universal test set available
- Optional I-Line ${ }^{\text {TM }}$ mounting (LX, LXI)
- Optional neutral current transformer for 4 -wire systems

## Full-Function Features:

- $100 \%$ rated ( 600 A sensor LE/LEL circuit breakers are $80 \%$ rated)
- True RMS sensing
- Interchangeable rating plugs
- PowerLogic ${ }^{\text {™ }}$ compatible
- LI, LIG, LS(I), LS(I)G (instantaneous OFF) configurations
- Short-time delay $=1^{2 t} \operatorname{IN} \& 1^{2 t}$ OUT and ground-fault delay $=I^{2 t} \operatorname{IN} \& 1^{2 t}$ OUT
- Short-time withstand rating
- Integral ground-fault testing
- Optional ground-fault alarm (no trip) (Requires CIM3F with PowerLogic, see Bulletin 0502DB0001.)
- LED long-time pickup indication
- Zone-selective interlocking (short-time \& ground-fault)
- Long-time and ground-fault memory
- Local Trip Indicators-overload, short circuit, ground-fault
- Local ammeter/trip indicator
- Universal test set available
- Optional I-Line ${ }^{\text {TM }}$ mounting (LE)
- Optional neutral current transformer for 4-wire systems

Class 600, 665, 736, 830

LA/LHL MC
For Mission Critical Power Loads Available in 200, 225, 250, and 400 A @ 480 Vac

## PowerPact ${ }^{\text {TM }}$ Mission Critical Circuit Breakers

## PowerPact D-Frame Mission Critical Circuit Breakers

When the D-frame Mission Critical circuit breaker is used as a main circuit breaker with QO branch circuit breakers, the D-frame MC will remain closed during any fault that occurs downstream of the QO circuit breaker up to 30kA at 208Y/120 Vac.
Ratings:

- UL 489 Listed
- CSA Certified
- Voltage: 208Y/120 V
- Handle ratings: 60-600 A
- AIR: 65 kA

Available Configurations:

- Four sizes: 150 A, 250 A, 400 A, and 600 A
- Main circuit breaker in NQ panelboards
- Unit mount for OEM users
- Plug-in base for OEM users
- Drawout base for OEM users

Table 11.30: D-Frame Mission Critical Circuit Breakers

| Circuit Breaker Cat. No. [16] | Continuous Current Rating | Terminal |  |

| DJL32600W | 600 A | 32510 | (2) 2/0-350 Cu or (2) 2/0-500AI |

## LA Mission Critical Circuit Breakers

The LA High Magnetic Withstand MC Circuit Breakers are designed to trip at a higher magnetic trip level (18-20 times handle rating) than typical molded case circuit breakers (MCCBs) (which trip at 5-10 times the handle rating).
The high magnetic withstand value of these LA circuit breakers allow the downstream branch circuit breaker to clear the fault.

Table 11.32: L-Frame-400 A, Thermal-Magnetic, High Magnetic Withstand Circuit Breakers For Mission Critical Loads

## Automatic Molded Case Switches

NOTE: These automatic molded case switches are in obsolescence. Do not use on new applications. Limited service stock is available for replacement or fill purposes. Contact the nearest sales office for product availability.
Automatic molded case switches open instantaneously at a factory preset magnetic trip point, calibrated to protect only the molded case switch itself, when it is subjected to high fault currents. The trip point is nonadjustable and provides no overload or low level fault protection.
Molded case switches open when the handle is switched to the OFF position or in response to an auxiliary tripping device such as a shunt trip.
Automatic switches will accept the same lugs and accessories as equivalent thermalmagnetic circuit breakers.
Automatic molded case switches are UL Listed per UL 489 and are CSA Certified.
Table 11.33: Automatic Molded Case Switches, 600 Vac

[^2]Mag-Gard ${ }^{\text {TM }}$ Motor Circuit Protector
Obsolescent Circuit Breakers

Mag-Gard Motor Circuit Protector
NOTE: These Mag-Gard motor circuit protectors are obsolete. Please refer to Digest Section 7 for PowerPact ${ }^{\text {TM }}$ molded case circuit breakers for new installations or replacement.
Instantaneous trip magnetic only circuit breakers have a single adjustment which simultaneously sets the magnetic trip level of each individual pole. Mag-Gard circuit breakers comply with NEC® requirements for providing motor circuit protection when installed as part of a UL Listed combination controller having motor overload protection. Interrupting ratings are established for these UL Recognized Components only when they are used in combination with motor starters with properly sized overload relays and contactors.

Mag-Gard circuit breakers will accept the same lugs and accessories as equivalent thermal-magnetic circuit breakers. Mag-Gard circuit breakers are available with I-Line construction. H-construction Mag-Gard circuit breakers are also available.

|  |  | 300-1100 A | FAL3610018M |

Adjustable instantaneous-trip circuit breakers are intended for use in combination with motor starters with overload relays for the protection of motor circuits from short circuits. Other specific applications include rectifiers and resistance welders. These circuit breakers contain a magnetic trip element in each pole with the trip point adjustable from the front. Interrupting ratings are determined by testing the instantaneous-trip circuit breakers in combination with a contactor and overload relay.
Select instantaneous-trip circuit breakers as follows:

- Use selection table for motors, other than NEMA Design E, with locked-rotor indicating code letters per NEC Table 430.7 (b) as follows. For other motors order a special thermal-magnetic circuit breaker with magnetic trip settings for the specific motorspecify motor horsepower, voltage, frequency, full-load current and code letter or locked rotor current.

| Horsepower | Motor Code Letters |
| :---: | :---: |
| $1 / 2$ or less | $\mathrm{A}-\mathrm{L}$ |
| $3 / 4$ to $1-1 / 2$ | $\mathrm{~A}-\mathrm{K}$ |
| 2 to 3 | $\mathrm{~A}-\mathrm{J}$ |
| 5 to 25 | $\mathrm{~A}-\mathrm{H}$ |
| 30 to 125 | $\mathrm{~A}-\mathrm{G}$ |
| 150 or more | $\mathrm{A}-\mathrm{F}$ |

- Determine motor hp rating from the motor nameplate.
- Refer to the table and select an instantaneous-trip circuit breaker with an ampere rating recommended for the hp and voltage involved.
- Select an adjustable trip setting of at least $800 \%$, not to exceed $1300 \%$, of the motor full-load Amperes. (FLA) for other than Design E motors. For Design E motors, select an adjustable trip setting of at least $1100 \%$ not to exceed $1700 \%$ of FLA.
- The NEC $1300 \%$ maximum setting may be inadequate for instantaneous-trip circuit breakers to withstand current surges typical of the magnetization current of autotransformer type reduced voltage starters, or open transition wye-delta starters during transfer from "start" to "run," constant hp multi-speed motors, and motors labeled "high efficiency." Select thermal-magnetic circuit breakers from Digest Section 7 for those applications.
- Part-winding motors, per NEC 430.3, should have two circuit breakers selected from the above at not more than one half the allowable trip setting for the horsepower rating. The two circuit breakers should operate simultaneously as a disconnecting means per NEC 430.103.

For use on vessels over 65 ft . ( 19.8 m ) in length.

## Marine Circuit Breakers

NOTE: These marine circuit breakers are obsolete. Please refer to Digest Section 7 for PowerPact ${ }^{\text {TM }}$ molded case circuit breakers for new installations or replacement.
A standard for molded case circuit breakers which are intended to be installed and used aboard a boat or vessel is included in Supplement SA to UL 489, "Standard for Molded Case Circuit Breakers and Circuit Breaker Enclosures" (also referred to as UL product category DKTY). This UL Standard was established in accordance with U.S. Coast Guard regulations, applicable American Boat and Yacht Council Inc. publications, and NFPA® 302 "Standard for Motor Craft (Pleasure and Commercial)". In order to be UL Listed for marine use, circuit breakers must not use aluminum or aluminum alloys for terminal connections and must be calibrated at an ambient temperature of $40^{\circ} \mathrm{C}$. Standard circuit breakers should not be specified or used in place of marine circuit breakers.

The following table lists those circuit breakers which are UL Marine Listed for use on vessels over 65 ft . ( 19.8 m ) in length. (PowerPact H and J-frame circuit breakers can also be used in vessels under 65 ft . [19.8 m] in length.)

Table 11.38: CIrcuit Breakers for Marine Applications

| Cat. No. Prefix | Poles | Ampere Rating | Application | Cat. No. |
| :---: | :---: | :---: | :---: | :---: |

Table 11.75: Accessory Mounting Locations

PA, PH, PC, PE, PX Series 4 circuit breakers or newer = Flield-installable accessories.
"L1" and "L2" or "R1" and "R2" port combinations are required to mount a single shunt trip. Both "L2" and "R2" ports will accept a UVR. Both "L1" and R1" ports will accept auxiliary switches. If alarm switch is factory installed in PA or PC circuit breaker, it will be installed in "R2" port. For a PE or PX circuit breaker, the alarm switch will be factory installed in "L2" port.

## LC, LI, LE, LX and LXI Circuit Breaker Termination Clip Kit

The standard lugs supplied with LC, LI, LE, LX and LXI circuit breakers are secured by means of a screw fastened through the circuit breaker terminal into the lug body. If the standard lug is removed and a bolted connection to the circuit breaker terminal is desired, the AL600IN threaded terminal clip kit is required to make this connection. The AL600IN clip snaps onto the bottom of the terminal. For ordering information, see chart below.

Table 11.76: Termination Clip Kit

## Electrical Operators

Provides remote ON, OFF/RESET control of molded case circuit breakers.

- A complete line of field-installable electrical operators.
- Not applicable on LC/LI/LE/LX/LXI circuit breakers.
- Installing side mounted motor operators on non I-Line ${ }^{\text {TM }}$ circuit breakers requires the use of a separate mounting pan.
- Side mounted electrical operators require an additional 4-1/2 in. ( 114 mm ) of mounting space in l-Line installations.

When remote indication of circuit breaker status is required, order circuit breaker with
1A-1B auxilliary switch for ON-OFF Indication and alarm switch for TRIP Indication.
Electrical operators require SPDT maintained contact switch. Refer to Class 9001 control unit listing for operators and pilot lights.
NOTE: Not available on Mag-Gard ${ }^{\top T}$ circuit breakers and molded case switches.

## Control Wire Tap Lugs

Control wire tap lugs are used in applications requiring connection to a small wire (22-14 AWG) for control circuits. This is accomplished by crimping the wire to a standard wire crimp terminal (not included) and fastening the terminal to the circuit breaker lug.
Note: To order as a factory-installed device on FI, KI, LC, LI, LXI, LX or LC circuit breakers, add suffix number 8041 to circuit breaker catalog number, e.g., KIL362258041.

Table 11.82: Control Wire Terminations for Circuit Breakers

## Power Distribution Connectors (PDC) for Circuit Breakers-for

 Field Replacement of Mechanical LugsCan be used for multiple load connections on one circuit breaker. Use in place of standard distribution blocks to save space and time.

Field-installable kits, including tin-plated aluminum connectors and all necessary mounting hardware are available for Square D FA, LA and Q4-frame molded case circuit breakers.

Connectors are UL Listed:

- For use on load end of circuit breaker only
- For use in UL508 Industrial Control applications only
- For use in UL 1995/CSA C22.2 No. 236 heating and cooling equipment
- For copper wire only

## Test Information

NOTE: Listed below are the catalog numbers and the components required for testing the entire family of Micrologic trip systems. The listing includes obsolete series trip systems.
Identified by a label on the front of the trip unit:
LE/LX/LXI, ME/MX, NE/NX and PE/PX circuit breaker 9/92 to present SE circuit breaker 10/92 to present

This is the latest series of standard (LX/LXI, MX, NX and PX) and full-function (LE, ME, NE, PE and SE) Micrologic trip systems.

Table 11.86: Universal Test Set

| Universal Test Set includes the following: | Cat. Nescription |
| :--- | :---: |
| 1. Self-test module (CBTMT)  <br> 2. Standard and full-function Micrologic Series B module (CBTMB) includes rating plug adapter  <br> 3. Power cord  <br> 4. Ribbon cable for making the connection from the test set to the rating plug adapter  <br> 5. Instruction manual UTS3 <br> For those customers who already own the Universal Test Set and want to test the latest standard  <br> and full-function (Series B) trip systems, all that is needed is the Micrologic Series B module  <br> (CBTMB). Included is the rating plug adapter and instruction manual. CBTMB <br> Replacement ribbon cable and rating plug adapter for CBTMB CBTMBRK <br> Long-time and ground-fault memory reset module (Series B Electronics) MTMB |  |

Identified by two rows of rotary switches
(ME/MX, NE/NX and PE/PX circuit breakers 11/89 to 9/92)
(SE circuit breakers 5/90 to 10/92)
For those customers who already own the Universal Test Set (CBTU1 or UTS3) and want to test these earlier series Micrologic trip systems, see the following chart.

Table 11.87: Micrologic Series 3 and Series A Circuit Breaker Test Module

| Circuit Breaker Test Module | Cat. No. |
| :--- | :---: |
| Includes rating plug adapter and instruction manual | CBTM4A |
| Replacement ribbon cable and rating plug adapter for CBTM4A | CBTM4RK |
| Identified by only one row of rotary switches |  |
| Micrologic Series 2 Test Modules are obsolete and no longer available. |  |

Table 11.88: Micrologic Series 2 Circuit Breaker Test Module

| Circuit Breaker Test Modules | Cat. No. | Availability |
| :--- | :---: | :---: |
| Replacement ribbon cable and rating plug for CBTM1 | CBTM1A | Not Available |
| ME, PE (4/85-11/89) CBTM2 obsolete, no longer available | CBTM2 | Not Available |
| ME, NE, PE (10/86-11/89) includes rating plug adapter and instruction manual | CBTM3 | Not Available |
| Replacement ribbon cable and rating plug for CBTM3 | CBTM3A | Not Available |

Table 11.89: Micrologic Series 1 Trip Systems for Circuit Breakers Manufactured Before Micrologic

| Trip System | Test Set |
| :--- | :--- |
| ME/PE (8/78-4/85) Identified by slide type switches instead of rotary switches. | Test Set |
| The very first series ME and PE electronic trip circuit breakers offered by Square D. | Not Available |

NOTE: For trip systems of this type that require testing, contact Technical Services toll free at 1-800-634-2003.

| PE12CT2 | Not Available | 2500 A |  |

Table 11．92：RIM32

## GFM Ground Fault Module

The Micrologic ground－fault module（GFM）is a UL Listed circuit breaker accessory for equipment protection．It is a combination ground－fault relay and ground－fault sensing device．
Micrologic Add－On Ground－Fault Module features：
－Used in combination with the FA，KA，FC，KC，FI，and KI type circuit breakers with a ground－fault shunt trip factory installed（add the suffix＂ G ＂to the circuit breaker）
－Adjustable ground－fault pickup levels
－Adjustable ground－fault time delays
－Integral ground fault push－to－test feature and ground－fault indicator
－All GFMs supplied for I－Line ${ }^{\text {TM }}$ mounting，easily convertible to unit mount by removing the I－Line brackets
－Neutral current transformer is supplied for 3－phase 4－wire applications．Refer to instructions for proper installation
－Zone－selective interlocking capability is standard with upstream Micrologic trip system circuit breakers．The GFM can also be zone interlocked with the GC ground－fault system by using a restraint interface module．See page 11－35．
－ 120 Vac control power is required for integral test feature．Meets NEC 230－95（c）
NOTE：Ground－fault modules cannot be reverse fed．
Table 11．91：Module／Enclosure Selection Chart

| Companion <br> Circuit <br> Breaker <br> Prefix | Cat．No． | Enclosure Space Required <br> S．－Line <br> Switchboard |  | Individual <br> Enclosure［1］ | Eround－Fault <br> Range |

## RIM32 Restraint Interface Module

The RIM32 Restraint Interface Module is used to interface the restraint signals between various Square D Micrologic ${ }^{\text {TM }}$ circuit breakers，Micrologic ground－fault modules，and GC－100 ground－fault protection systems．
The restraint interface module operates on either 120 or $240 \mathrm{Vac}, 50 / 60 \mathrm{~Hz}$ ．The module is protected by a $1 / 4 \mathrm{~A}$ fuse．
Allowable ZSI combinations are shown in the table below．（Series numbers for current design circuit breakers end in B，for example NE Series 3B．）For double－ended or larger systems，or systems which contain devices from different columns in the table below， contact your local Sales Office for combination information．
If more inputs or outputs are needed，another restraint interface module is necessary． Contact your local Sales Office for information on multiple module installations．
NOTE：The maximum distance between devices is 1000 ft ．（ 305 m ）．
Table 11．93：ZSI Combination（Where All Inputs Driven are Same Columns）

|  | Circuit Breaker Series Inputs |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Circuit Breaker Series Outputs |  |  |  | ๗ ～岂曻 ゆ゙も ＋$\infty$ 플 |  <br> 岂曻 <br> ども <br> 쁠를 |  | － | ¢ |
| SE 2 （Ground Fault） | 50 | － | R | R | R | R | R | 50 |
| SE 2 （Short Time） | － | 1 | R | R | R | R | R | 50 |
| ME 3，NE 1，PE 4 | 50 | R | 15 | 2 | 13 | 47 | R | 50 |
| ME 4， 5 \＆5A，NE 2， 3 \＆3A，PE 5， 6 \＆6A，SE 3 \＆3A | 50 | R | R | 1 | 1 | 7 | R | 14 |
| LE 1B，ME 5B，NE 3B，PE 6B，SE 3B | 50 | R | 10 | 1 | R | 26 | R | 44 |
| GC100 | R | R | R | R | R | R | 7 | 50 |
| GFM［2］ | 50 | － | 2 | 1 | 1 | 5 | R | 1 |
| RIM32 | 50 | 6 | 50 | 7 | 37 | 50 | 15 | 50 |

\＃＝Maximum inputs without RIM32．Self－restraint counts as one input．
$\mathrm{R}=\mathrm{RIM} 32(\mathrm{~s})$ required to restrain any device．
$-=$ Invalid combination．

## To order

NOTE: Masterpact M/MP/MC circuit breakers and related accessories are obsolete. Use Masterpact NT/NW for new applications. See Digest Section 7. Limited service stock is available for replacement or fill purposes. Contact the nearest sales office for product availability.
To order a complete circuit breaker, order:

- Circuit breaker fixed or drawout frame. $\qquad$ order from table below. or circuit breaker without cradle order from table below.
- Connections page 11-40
- Control unit page 11-37
- Rating plug page 11-37
- Accessories
page 11-38
Fixed and drawout circuit breakers listed below are complete with the STR58U Trip Unit which includes long time, short time, instantaneous and ground fault as well as options $T$ (residual) and I (ammeter).

[^0]:    Contact your local Sales Office for availability.

[^1]:    [1] $70-100 \mathrm{~A}$ is 4.00 in
    [2] Dimensions E are 1.59 in at ON end and 0.63 in at OFF end.
    [3] FCL 2-pole circuit breaker dimension B is 4.50 as in Fig. 23.

[^2]:    [17] The withstand rating is the fault current at rated voltage that the molded case switch will withstand without damage when protected by a circuit breaker with an equal continuous current rating.
    [18] The short circuit current rating is the fault current, at rated voltage, that the molded case switch will withstand without damage when protected by a circuit breaker with an equal continuous current rating.
    [19] UL magnetic trip tolerances are $-20 \% /+30 \%$ from the nominal values shown.
    [20] FHL and KHL automatic switches will not accept cylinder lock attachments.
    [21] The withstand rating is the fault current at rated voltage that the molded case switch will withstand without damage when protected by a circuit breaker with an equal continuous current rating.

[^3]:    [1] UL magnetic trip setting tolerances are $\pm 25 \%$ for low and $\pm 20 \%$ for high from nominal values shown.
    [2] The AL100MA lug is the only lug available for the 1200 A MA and MH circuit breakers.
    [3] 2P circuit breaker catalog numbers are completed by adding required phase connection letters as suffix to catalog numbers. See Phase Options table.

[^4]:    [7] Unless otherwise specified, wire sizes apply to both aluminum and copper conductors.
    8] See instruction bulletins for recommended tools
    [9] These lug kits cannot be used on I-Line ${ }^{T M}$ circuit breakers.
    [10] All P-frame circuit breakers require terminal pads for mounting lugs of any type.
    [11] Kit includes long terminal shield, which adds 1.65 inches to standard lug with short terminal shield.
    12] Not for use with I-Line circuit breakers.
    [13] When using fine stranded wire, increased cross sectional area may cause maximum wire size to be reduced
