## Altivar ${ }^{\text {TM }} 212$ Drives

The Altivar 212 drive is for use with three-phase asynchronous motors for variable torque pump and fan applications. Select the Altivar 212 drive using the motor nameplate voltage, the full load ampere rating and the table below. The Altivar 212 drive includes 3 logic inputs, 2 analog inputs, 1 analog output, and 2 relay outputs (with 1 NO and $1 \mathrm{NO} /$ NC contacts). The Altivar 212 drive includes an integrated 4 digit, 7 segment LED display with a 7 button keypad and includes an RJ45 Modbus port plus a four-screw terminal block for BACnet, Modbus, Metasys N2 and Apogee P1 communication protocols. LonWorks ${ }^{\top \mathrm{M}}$ is available in an option card.

[11] When ordering replacements for Square $D^{T M}$ brand $E-F l e x ~{ }^{T M}$, MCC and M-Flex ${ }^{T M}$ enclosed drive controllers containing the Altivar 61 drive, identify the replacement catalog number by referring to the applicable instruction manual, the side nameplate on power converter, or using the graphic keypad (menu 1.11 identification).
[12] Option to have product treated for increased protection for dusty and corrosive environments. This product is not stocked. On 1 hp to 10 hp at 230 Vac 3 phase and up to 100 hp at 460 V , add "S337" to the end of the catalog number. On 15 hp to 60 hp at 230 Vac 3 phase, add " 337 " to the end of the catalog number. With this option, exposed copper is tinned, circuit boards are conformal coated in critical areas and plastics are treated to better withstand the corrosive nature of certain oils. This option is standard on $55 \mathrm{~kW} / 75 \mathrm{hp} @ 230 \mathrm{Vac} 3$ phase and higher and 90 kW/125 hp @ 460 Vac and higher
[13] These products can be ordered with LonWorks ${ }^{\circledR}$ or BACnet communication option card shipped as one line item. Field installation required. Add "LW" to the end of the part number to receive a LonWorks option card. Add "BN" to the end of the part number to receive a BACnet option card.
[14] These products can be ordered with LonWorks ${ }^{\circledR}$ or BACnet communication option card shipped as one line item. Field installation required. Add "LW" to the end of the part number to receive a LonWorks option card. Add "BN" to the end of the part number to receive a BACnet option card.
[15] Product does not contain an EMC filter.
[16] Product ships with a DC choke that must be field mounted. A $5 \%$ line reactor may be purchased and installed in place of the DC choke. Add "D" to the end of the catalog number to receive just the AC drive
[17] These products can be ordered with LonWorks ${ }^{\circledR}$ or BACnet communication option card shipped as one line item. Field installation required. Add "LW" to the end of the part number to receive a LonWorks option card. Add "BN" to the end of the part number to receive a BACnet option card
18] These products do not contain a dynamic braking transistor. A separate transistor must be added for applications requiring dynamic braking

[19] Conformal coating is standard.
[20] Product does not contain EMC filter
[21] An AC 5\% line reactor is mandatory.
[22] These products do not contain a dynamic braking transistor. A separate transistor must be added for applications requiring dynamic braking.

## Altivar ${ }^{\text {TM }} 61$ Single-Phase Drives

In an application where it is necessary to use a 240 V single-phase input for a 3-phase
 motor, the drive must be derated; therefore, the power listed on the drive nameplate will be higher than the power rating on the motor nameplate.
For more information on wire and line reactor sizing, refer to Altivar 61 and 71 Supplementary Ratings (30072-451-38) and Price Guide 8800PL9701 for line reactor selection and pricing.

Table 26.9: Altivar 61 Selection and Pricing

[25] Product does not contain an EMC filter.
[26] Option to have product treated for increased protection for dusty and corrosive environments. This product is not stocked. On 0.5 hp to 5 hp at 230 Vac single phase, add " 3337 " to the end of the catalog number. On 7.5 hp to 25 hp at 230 Vac single phase, add " 337 " to the end of the catalog number. With this option, exposed copper is tinned, circuit boards are conforma coated in critical areas and plastics are treated to better withstand the corrosive nature of certain oils.

## Altivar 71 Single-Phase

In an application where it is necessary to use a 240 V single-phase input for a 3-phase motor, the drive must be derated; therefore, the power listed on the drive nameplate will be higher than the power rating on the motor nameplate.
For more information on wire and line reactor sizing, refer to Altivar 61 and 71
Supplementary Ratings (30072-451-38).

[30] Also possible for use with a synchronous motor. Add " 383 " to the end of the catalog number.
[31] Option to have product treated for increased protection for dusty and corrosive environments. This product is not stocked. On 0.5 hp to 10 hp at 230 Vac 3 phase and up to 100 hp at 460 V add " S 337 " to the end of the catalog number. On 15 hp to 60 hp at 230 Vac 3 phase, add " 337 " to the end of the catalog number. With this option, exposed copper is tinned, circuit boards are conformal coated in critical areas and plastics are treated to better withstand the corrosive nature of certain oils. This option is standard on $55 \mathrm{~kW} / 75 \mathrm{hp} @ 230$ Vac 3 phase and higher \& 90 kW/125 hp @ 460 Vac and higher.
[32] Product does not contain an EMC filter.
[33] Product ships with a DC choke that must be field mounted. A 5\% line reactor may be purchased and installed in place of the DC choke. Add "D" to the end of the catalog number to receive just the AC drive.
[34] Conformal coating is standard.
[35] Option to have product treated for increased protection for dusty and corrosive environments. This product is not stocked. Up to 100 hp at 460 V , add "S337" to the end of the catalog number. With this option, exposed copper is tinned, circuit boards are conformal coated in critical areas and plastics are treated to better withstand the corrosive nature of certain oils. This option is standard on $90 \mathrm{~kW} / 125 \mathrm{hp} @ 460$ Vac and higher.
[36] Also possible for use with a synchronous motor. Add " 383 " to the end of the catalog number and multiply the listed price by 1.2 to obtain new price.

Table 26.12 Altivar $^{\text {TM }} 71$ Selection (cont'd.)

[37] Option to have product treated for increased protection for dusty and corrosive environments. This product is not stocked. Up to 100 hp at 460 V , add " S 337 " to the end of the catalog number. With this option, exposed copper is tinned, circuit boards are conformal coated in critical areas and plastics are treated to better withstand the corrosive nature of certain oils. This option is standard on $90 \mathrm{~kW} / 125 \mathrm{hp}$ @ 460 Vac and higher.
[38] Also possible for use with a synchronous motor. Add " 383 " to the end of the catalog number and multiply the listed price by 1.2 to obtain new price.
[39] Product ships with a DC choke that must be field mounted. A $5 \%$ line reactor may be purchased and installed in place of the DC choke. Add "D" to the end of the catalog number to receive just the AC drive.
[40] These products do not contain a dynamic braking transistor. A separate transistor must be added for applications requiring dynamic braking.
[41] Conformal coating is standard.
[42] An AC 5\% line reactor is mandatory

[47] Normal duty applications requiring an overload up to $110 \%$ for 60 seconds. Also known as variable torque loads.
[48] Heavy duty applications requiring an overload up to $150 \%$ for 60 seconds. Also known as constant torque loads.
[49] These values are given for a nominal switching frequency of 4 kHz up to ATV630D45N4, or 2.5 kHz for ATV630D55N4...D90N4 for use in continuous operation. The switching frequency is adjustable from $1 \ldots 16 \mathrm{kHz}$ for all ratings. Above 2.5 or 4 kHz (depending on the rating), the drive will automatically reduce the switching frequency in the event of an excessive temperature rise. For continuous operation above the nominal switching frequency, derate the nominal drive current (see the derating curves on our website www.schneider- electric.com).
[50] Typical value for the indicated motor power and for the maximum prospective line Isc.
schneider-electric.us

## Variable Torque AC Drive-208 V, 230 V, and 460 V Ratings

The S-Flex enclosed drive features the Altivar 212 drive and provides 100 KAIC rating for commercial pump and fan applications.
The S-Flex is an economical package that includes a circuit breaker disconnect and option bypass contactors, drive input disconnect switch or line contactor.
The S-Flex is rated as a NEMA Type 1 enclosure an ideal for use in residential high rise and mixed-use buildings, commercial office buildings, schools and campus environments.

All S-Flex 212 Enclosed Drives are supplied with:

- Altivar ${ }^{\text {™ }} 212$ power converter
- Square $D^{T M}$ circuit breaker disconnect (Power Fuses for 460 V version only)
- UL 508C coordinated short circuit rating for 100,000 A
- Adjustable Frequency Controller-Off-Bypass selector switch
- Local/Remote configurable on controller
- Power On red LED
- Bypass Run green LED
- Fire/Freezestat interlock for Adjustable Frequency Drive and Bypass mode
- Form C Adjustable Frequency Controller fault auxiliary contact
- Modbus RJ-45 communication por
- Smoke Purge Function
- Bypass Run Auxiliary Contact
- Drive Run Auxiliary Contact
- Full Voltage Bypass Power Circuit with overload relay
- 120 Vac fused control power transformer

NOTE: See the Instruction Bulletin for set up instructions.

## Altistart ${ }^{\text {TM }} 22$ Soft Starters

The Altistart 22 is designed for commercial and normal duty industrial applications, it uses both voltage and torque control to provide a soft start and soft stop for there-phase asynchronous motors between 17 A and 590 A . The conformal-coated, printed circuit boards provide enhanced resistance to harsh environments, increasing the service life of installations and lowering maintenance costs.
Select the Altistart 22 soft starter using the nameplate full-load ampere rating of the motor and the table below. The horsepower ratings are for reference only.

## Altistart ${ }^{\text {TM }} 48$ Soft Starters

The Altistart 48 soft starter combines ease of selection with simple installation and high motor control performance. With its exclusive motor Torque Control System, the Altistart 48 helps eliminate uncontrolled motor acceleration and deceleration, a problem inherent with standard voltage-ramp soft starters. The Altistart 48 includes features to help with motor and machine protection and is available for motors ranging from 208 to 575 volts. In addition to a built-in display and programming terminal, a remote keypad option and programming software is available to ease integration and commissioning. The Altistart 48 has a built-in Modbus ${ }^{\text {TM }}$ port and is offered with serial communication gateways to such popular networks as Ethernet and DeviceNet ${ }^{\text {TM }}$.
Open Style Soft Starters $\mathbf{5 0 - 6 0 ~ H z}$, Three-Phase, 690 V Maximum
The Altistart 48 soft starter must be selected using the table below, based on nameplate full load ampere rating of the motor. The horsepower ratings shown in table are for reference only.

Table 26.25: Altistart 48 Selection [6]

| Standard Duty (Low Inertia Loads) [7] Maximum Horsepower |  |  |  |  | Altistart Soft Starters |  |

## Enclosed Altistart ${ }^{\text {TM }} 22$ Motor Controllers

Enclosed Altistart 22 (ATS22) solid-state combination motor controllers are a preengineered, integrated solution for reduced voltage starting and soft stopping of standard three-phase asynchronous induction (squirrel cage) motors. The Enclosed 22 controllers consist of a disconnect means and an ATS22 softstarter in a stand-alone enclosure. Enclosed 22 controllers integrate the ATS22 softstart technology into a combination package for application requirements up to 400 hp at 460 V .

- 3-150 hp, 208 V
- 5-200 hp, 230 V
- 10-400 hp, 460 V
- 15-500 hp, 575 V

[1] This option is not selectable with power circuit option B05.
2] Select only one option.
[3] To omit, do not include a selection in the catalog number.
[4] This option is available only for enclosure size D.
[5] This option is not selectable with power circuit option B05
[6] This option is not selectable with power circuit option B05. This option is valid only with the following control options: C06, D06, or E06.
[7] Options E10 and Z10 cannot be used together.
[8] This option is not selectable with power circuit option B05. The contacts are available only when power circuit option Y05 is selected.
[9] The contacts are not available when power circuit option R05 is selected. This option is valid only with the following control options: C06, D06, or E06.
[10] If you select option U10, you must separately order the remote keypad (VW3G22101) and cable (VW3A1104R30) to commission the softstarter. Refer to the ATS22 User Manual, BBV51330, for serial communication programming and control capabilities.
[11] Options E10 and Z10 cannot be ordered together

## Control Options (pick one)

| $\begin{aligned} & \text { Mod } \\ & \text { A06 } \end{aligned}$ | Start/Stop push buttons |
| :---: | :---: |
|  | Provides black start and red stop push buttons (3-wire control scheme). |
| $\begin{aligned} & \text { Mod } \\ & \text { B06 } \end{aligned}$ | Forward-Off-Reverse selector switch |
|  | Provides three-position selector switch to select between forward, off and reverse. Uses 2-wire control. |
| $\begin{aligned} & \text { Mod } \\ & \text { C06 } \end{aligned}$ | Hand-Off-Auto selector switch |
|  | Provides a three-position selector switch, 2-wire control scheme. |
| $\begin{aligned} & \text { Mod } \\ & \text { D06 } \end{aligned}$ | Stop-Run selector switch |
|  | Provides a two-position selector switch. |
| Mod <br> E06 | Hand-Auto selector switch and Start/Stop push buttons |
|  | Provides a two-position selector switch and start/stop push buttons (3-wire control). |

Pilot Light Cluster Options (pick one)

| Mod A07 | Pilot light cluster \#1 |
| :---: | :---: |
|  | Consists of red "RUN" and green "OFF" pilot lights. Provides standard red "RUN (ON)" and green "OFF" pilot lights for status annunciation. |
| Mod B07 | Pilot light cluster \#2 |
|  | Consists of red "RUN" (push-to-test) and green "OFF" (push-to-test) pilot lights. Provides push-to-test type red "RUN (ON)" and standard green "OFF" pilot lights for status annunciation. |
| Mod C07 | Pilot light cluster \#3 |
|  | Consists of red "RUN", green "OFF" and yellow "FAULT" pilot lights. Provides standard red "RUN (ON)" green "OFF" and yellow "FAULT" pilot lights for status annunciation. |
| Mod D07 | Pilot light cluster \#4 |
|  | Consists of red "RUN (ON)" (push-to-test), green "OFF" (push-to-test) and yellow "FAULT" (push-toreset) pilot lights. Provides push-to-test type red "RUN (ON)" standard green "OFF", and push-toreset type yellow "FAULT" for status annunciation. |

## Meter Display Options (pick one)

| Mod <br> BO8 | Elapsed time meter |
| :--- | :--- |
|  | Provides a seven-digit analog, non-resettable elapsed run time meter. Not available on Type 3R |
|  | Enclosures |

Miscellaneous Options (multiple compatible options may be selected

| Mod <br> A10 | Floor mounting kit |
| :--- | :--- |
|  | Only available for size D enclosures. |
| Rules: Available for power options S05, N05, R05, Y05. |  |
| Mod |  |
| B10 | 150 VA additional control power capacity |
|  | Provides 150 VA additional control VA capacity for customer use. |

## Information and Selection of AC Drives

For information and selection, contact your nearest Schneider Electric sales office or visit our website:
www.schneider-electric.us

## Technical Support for AC Drives

## Drive Product Support Group

For support and assistance, contact the Drive Product Support Group. The Drive Product Support Group is staffed from 8:00 am until 8:00 pm Eastern time to assist with product selection, start-up, and diagnosis of product or application problems.
EMERGENCY Technical phone support is available 24 hours a day, 365 days a year.

| Toll Free: | $888-778-2733$ |
| :--- | :--- |
| E-mail: | drive.products.support@schneider-electric.com |
| Fax: | $919-217-6508$ |

Services (On-Site)
Square D Services is your single source of service expertise for all major brands of electrical equipment. With our national network of service locations and qualified experts, Square D Services is capable of providing customer-based solutions anywhere in the United States. Services responds to your requests, seven day a week, 24 hours a day.

```

## Customer Training for AC Drives

Schneider Electric offers a variety of instructor-led, skill enhancing and technical product training programs for customers. For a complete list of drives/soft starter training with dates, locations, and pricing, please call:

## Phone: 978-975-9306 <br> Fax: 978-975-2821

## Packaged Product Documentation for AC Drives

## Standard Documentation

Each adjustable frequency drive or soft starter shipped includes one set of instruction bulletins. Each set of instruction bulletins includes installation, start-up, troubleshooting and wiring diagram information. Separate Approval and/or Record Drawings are not included.

## Approval and Record Drawings

All factory orders for enclosed drives and soft starters come with factory supplied user drawings and are identified by a factory order number. The factory supplied drawing set typically includes:

- Enclosure outline drawing
- Power elementary drawing
- Control elementary drawing
- Interconnection drawing

These drawings are also available in DWG, DXF, IGS, Microcad and PDF formats upon customer request.

## Product Literature
